

Lacked	A robust walkthrough of the Hyrax stack
Lacked	Clarity between conference website, wiki pages, and sched (communication)
Lacked	I don't want to install stuff on my phone
Lacked	Wish I'd known that breakfast/lunch were hot on Thursday (as opposed to what we had on Wednesday)
Lacked	Dedicated meeting times for interest groups
Lacked	Sessions were developer focused it seemed, would have been nice to have more user focused options
Lacked	Content on user perspective/needs
Lacked	UX focus / content
Lacked	Dev time at the end to implement new ideas
Lacked	Hearing about "community over code" is worrying like people are going their own way
Lacked	Time to [explore???] Day 3 track and think about what to do
Lacked	Scheduling can be better. Unconference at the end of the day kinda sucks...
Lacked	Enough time to prepare for Thursday unconference
Lacked	Some spaces for unconference not conducive for group discussion
Lacked	Comfy places to sit and rest on Thursday
Lacked	Limited variety of snack/lunch foods (no/little gluten-free, decaf options)
Lacked	Better food options particularly gluten-free options
Lacked	Protein at breakfast
Lacked	Protein at breakfast
Lacked	Honestly, not much. Maybe having everything in the same areas? As opposed to different buildings / different days.
Lacked	Limited number of outlets / powerstrips on day 1 & 2
Lacked	Consistent nametag information - so many first names only!
Lacked	Wifi not entirely reliable
Lacked	More on infrastructure topics
Lacked	Repository of conference proceedings
Lacked	Related to dev --> more hands-on workshops --> maybe a three day track for developers
Lacked	Consistent A/V setup -- some rooms needed mics
Lacked	Very code-heavy presentations
Lacked	Reminder of how to be a gatekeeper -- we need a thoughtful revision of those guidelines & presentation thereof

Lacked	Themed dinners
Lacked	Organization of dinners / social events
Lacked	Enough microphones
Lacked	Can it go lightning talks and then posters?
Lacked	Time to enjoy something about St. Louis
Lacked	More inclusive social activity (outside of conference)
Lacked	Organized evening events for interest groups / topics
Lacked	A full group activity Thursday
Lacked	Musical guest & fireworks / laser light show
Lacked	Demos
Lacked	Description of breakfast (more details please)
Lacked	Rooms were hot
Lacked	Room captions / timekeepers
Lacked	Discuss / work on documentation
Lacked	For nothing!
Lacked	Hard to tell how technical a presentation would be from description
Lacked	Some presenters didn't introduce themselves or just first name only "You all know me" is not optimal to introduce to new folks
Lacked	More time to move between sessions
Lacked	Daily emails went to spam -- didn't find at first!
Lacked	Clearer organization strategies for getting a sense of how many people were going where
Lacked	Room numbers picked for panels in advance
Lacked	Announce developer congress dates along with dates for conference. Not after the fact.
Lacked	Lightning talks & posters at same time
Lacked	Ability to do both lightning talks and poster sessions
Lacked	Ability to do posters and lightning talks at the same time
Lacked	I thought that there could have been a general reception aside from any sessions
Lacked	Enough clones of myself to do more workshops & sessions
Lacked	Metadata-related unconference scheduling disaster
Lacked	Dead time between IG/WG updates and poster sessions
Lacked	Time to attend lightning talk since I was manning the poster

Lacked	Deep dive -- show code
Lacked	More in-depth info on projects for newbies
Lacked	Space for all (or more) underrepresented communities to get together
Learned	Lots of moving parts to Samvera
Learned	The way Kyrax as a product is planned, developed, and managed
Learned	A lot about the current state of many community projects -- really got the big picture
Learned	The approach & lessons learned from various universities to develop Samvera-based solutions
Learned	What other people are doing
Learned	There are a lot of common needs still looking for a platform to collaborate
Learned	Of similar work being done at other institutions
Learned	Community is hyper polyglot
Learned	About new tools we can actually start using
Learned	About several tools we can use now!
Learned	I learned about webpack & stimulus
Learned	Found out stuff about Valkyrie (as non-developer)
Learned	A lot more about Valkyrie
Learned	Related to dev --> actor stack --> Valkyrie
Learned	A lot about Valkyrie (including what the heck it is)
Learned	New community efforts and progress with Valkyrie and wings. I didn't now these were being developed
Learned	About Wings. Knew nothing before this about it
Learned	What Wings is, exactly.
Learned	Gained a better understanding of relationship between Hyrax, Valkyrie, Fedora, etc.
Learned	Valkyrie details
Learned	More about gems I could use
Learned	Wings is progressing very well
Learned	A lot about Hyrax & Valkyrie
Learned	More about Valkyrie
Learned	A lot about how the Wings adapter sits in Hyrax for 2-way translation
Learned	Increasing institutional misalignment (my institution & the community)
Learned	Samvera Community needs better communication across community

Learned	The value of community in addition to code
Learned	About infrastructure / Docker
Learned	Others have same problems we do
Learned	I'm not the only one making mistakes or struggling
Learned	A couple of dev tricks from a junior developer & newbie
Learned	I learned what things the community is developing, which is quite helpful
Learned	Who was using particular tech (AWS, Docker, GraphQL)
Learned	About how others are approaching similar challenges
Learned	Tons at workshops
Learned	Mindful coding panel (content)
Learned	Different projects / components, how they relate
Learned	Hyku & how it serves as an out-of-box instance of Hyrax. Especially for any institution without a lot of developer money
Learned	Wide array of work going on across the community
Learned	My challenges are also shared by others
Learned	How other institutions are using Hyrax & that they have the same issues that we do
Learned	Lots of people are struggling with the same issues we are (I learn this every year)
Learned	More about the Hyrax roadmap (Valkyrie specifically)
Learned	Docker's place in Hyrax development
Learned	Wings / Valkyrie
Learned	I learned how to work on Wings
Learned	To love Sched
Learned	Different deployment strategies
Learned	More about Wings & Valkyrie
Like	The facilities
Liked	An increase in diversity of attendees
Liked	Community over code (but code matters)
Liked	The sense of community
Liked	The clear amount of work for steering and future planning for the Samvera community
Liked	Everyone has been quite friendly
Liked	Very friendly, welcoming community to a newcomer

Liked	Broad, cross-job topic presentations
Liked	Variety of programming (for developers)
Liked	A keynote from WashU speaking about their research and teasing how we might help
Liked	Opening plenary
Liked	Keynote (both having one & the specific one we had)
Liked	Keynote subject
Liked	Opening keynote
Liked	The keynote
Liked	Opening plenary / keynote
Liked	The opening plenary speaker
Liked	Keynote
Liked	Keynote speaker
Liked	Keynote!
Liked	I loved the plenary speaker - I liked that it was an interesting brain-warming talk and not technical / vendor / etc.
Liked	Dev congress Valkyrie commit to code solved real issues
Liked	Dev congress was great!!! Got a lot done.
Liked	Overall structure of Monday event, Tuesday workshops, Wednesday-Friday conference (with half-day Friday)
Liked	Diversity of work represented
Liked	Valkyrie presentations
Liked	Getting deep technical surveys of Valkyrie and other libraries
Liked	Openness to alternative app implementations and/or tooling
Liked	Just the right number of unconferences
Liked	Yummy food
Liked	Full breakfast
Liked	Conference on a campus, not hotel
Liked	Location Wash U
Liked	Wash U campus
Liked	Smiling faces from host committee!
Liked	Conference was well organized

Liked	How organized & smoothly the conference went WUSTL ROCKS
Liked	Overall punctuality of events and presenters
Liked	All the signs for where meeting rooms are located
Liked	Buffet breakfast (yum!)
Liked	Refreshments every day
Liked	Snacks
Liked	Food on Thursday
Liked	Projectors & mics all worked well; facilities were nice
Liked	Bag check
Liked	Bag check!
Liked	Helper response to medical emergency
Liked	St. Louis & Wash U setting & location
Liked	Nearby lunch / dinner options on Delmar
Liked	Organization and signage and morning emails about the day plans
Liked	Venue was exceptional
Liked	Plenary lightning talks
Liked	Workshops!
Liked	Collaboration spirit and sharing
Liked	Talk about Samvera-level tools (API)
Liked	The nearby lunch / dinner options on Delmar
Liked	Wash U venue
Liked	Venue was amazing!
Liked	Signs on room doors
Liked	St. Louis - central & affordable
Liked	Bag check
Liked	The venues
Liked	Awesome sessions, especially code read throughs
Liked	Code of conduct
Liked	Private space for women's happy hour
Liked	Food was great

Liked	Food / snacks / beverages
Liked	Developer congress!
Liked	WG reports
Liked	The presentations on Thursday
Liked	Sponsorships! Get that \$\$\$
Liked	Being at a university (I like us to be in our workspaces)
Liked	The venues
Liked	Facility. Wash U was amazing!
Liked	Stickers (hex)
Liked	The poster sessions variety
Liked	Mentorship program
Liked	Meeting new people in the community
Liked	All the hospitality
Liked	Getting to socialize with everyone (F2F time)
Liked	Seeing everyone together in person - always great for community building
Liked	All the newcomers to conference!
Liked	This is an awesome community
Liked	Genuine affection felt in this community
Liked	Meeting people I've only interacted with remotely
Liked	The positive vibe!
Liked	Seeing people in person
Liked	Meeting new people!
Liked	Good, ample time for unconference sessions
Liked	Very inclusive towards newer members of the community
Liked	Sessions about how people got into a bad situation & worked on making it better
Liked	Hearing about the successes and the challenges of everybody
Liked	Closing plenary
Liked	Session at end
Liked	Jess leading this session
Liked	Closing plenary

Liked	The retrospective
Liked	The structure & format of the conference
Liked	The food & the hosts!
Liked	The constant availability of snacks & drinks
Liked	Availability of coffee / food / refreshments at breaks & throughout
Liked	Amount of breakfast / lunch / break time for talking with people, exploring, resting, etc.
Liked	Long lunches
Liked	Longer lunch time, gave time for multiple conversations
Liked	Amount of available power outlets
Liked	Hands-on coding workshops
Liked	Workshops
Liked	Presentations on Thursday (folks talking about their experience & projects)
Liked	Food (light bites were amazing)
Liked	I liked the abundance of food :)
Liked	Issues for implementing Hyrax instance
Liked	API talk
Liked	Really liked overall schedule
Liked	The people!
Liked	Friendly people sharing their own systems / experience
Liked	Developer congress groups worked well
Liked	I liked getting to do some actual coding
Liked	So many great sessions!
Liked	I liked the short 25-minute sessions, though it meant a lot of moving around frequently
Liked	Keynote speaker and the fact that they were local
Liked	Keynote (having one and the one we had)
Liked	Shorter 30-minute Thursday sessions
Liked	Pre-conference dev congress
Liked	The unconference sessions
Liked	The closing plenary. Feels like the conference actually ended rather than petering off
Liked	Sessionizer

Liked	Room captains
Liked	Poster session was a good way to learn about projects / use cases
Liked	Conference tracks -- the quantity and the groupings
Liked	Time for walks between sessions
Liked	Plenary lightning talks
Liked	Keynote! Liked hearing new thoughts / perspectives re: local area also for thinking on context in repos
Liked	Opening plenary
Liked	Workshops
Liked	Infrastructure talks
Liked	Food
Longed for	Hands on Hyrax experience
Longed for	More beginner friendly tech talks/discussions
Longed for	A Samvera library of function and it's corresponding code/dependencies
Longed for	More interaction/sessions for non-developers
Longed for	More learning / context for the less technical - especially preconference workshops & unconferences
Longed for	Longer / more unconference time
Longed for	Schedule developer congress / partner and workshops should have bookended conference for those who go to only 1
Longed for	Fedora details
Longed for	Hyrax on wings stickers (and I got them)
Longed for	A decision on a community manager (partners)
Longed for	Less duplication of effort in the community
Longed for	Distinct time for IG/WG meetings separate from unconference
Longed for	Would have liked a tour of campus, structured time to explore
Longed for	Outdoor sessions
Longed for	Spiked milkshakes
Longed for	Convenient water source during Monday's Developer Congress
Longed for	A central hotel for all
Longed for	Free parking closer hotel
Longed for	Not overlapping a Jewish holy day (I know this is hard in the fall.) (I missed the workshops & developer congress)

Longed for	More organized social events in evening (e.g., newcomer dinner)
Longed for	A place on the conference wiki for self-forming social (e.g., group signup for dinner, signup to go to museum or Arch, etc.). Done well at Salt Lake City.
Longed for	Dine-arounds
Longed for	Maybe a gathering for first-timers
Longed for	Bring back newcomers dinners
Longed for	Time to do something more active
Longed for	Organization dinner
Longed for	Social newcomer ops
Longed for	Organized all-conference happy hour
Longed for	Perhaps more evening networking opportunities
Longed for	A clear moment egress of women in tech so we could collectively observe that loss
Longed for	A group hike / walk / activity
Longed for	More opportunities for social activities in the evening
Longed for	Better social options to meet more people
Longed for	People posting evening stuff on channel, e.g., "some of us are at x bar come on by!"
Longed for	More formally organized (or promoted) social events
Longed for	I missed finding out about the city museum event
Longed for	Newcomer dinner (sign-up for dinner with strangers)
Longed for	Social events w/ group
Longed for	Planned evening outing options - to plug into easier for those who know fewer people / options
Longed for	Official reception / social event
Longed for	Women's happy hour location that accepts credit card
Longed for	More newbie / old-hand mixing
Longed for	Assessing community needs comes at a cost - how does the Samvera software become generalized for non-developers
Longed for	How is Samvera perceived by the Ruby on Rails community?
Longed for	Video recorded presentations
Longed for	UCB-3 dongles for presenters
Longed for	Not to be so spread out
Longed for	More details about meals provided. I didn't know Thursday breakfast was to be awesome (and I missed it)

Longed for	An announcement of posting our community manager position during opening plenary
Longed for	?
Longed for	More non-developer focused sessions
Longed for	Longer, more in-depth talks
Longed for	More time
Longed for	Wish there was more time for sessions, they were short
Longed for	More QA time for some sessions
Longed for	Live streaming and/or recording of classes / sessions / keynote
Longed for	Unconference sessions could have had the Google docs notes pre-attached on Sched
Longed for	Posters sessions not conflicting with lightning talks
Longed for	Wish it was a single track for a little longer
Longed for	Some competing sessions didn't need to be stacked against each other topically
Longed for	It was hard to decide which presentations to go to because of competing interests
Longed for	Wish the poster session and lightning talks did not happen at the same time
Longed for	More unconference sessions
Longed for	Best practices talks
Longed for	Karaoke group
Longed for	More geospatial or data presentations
<b>Which L?</b>	<b>Feedback</b>
