Generic Work

A Work of Some Sort ^{Public}

[Add to Collection](#) [Analytics](#) [Edit](#) [Attach Child](#) [DDP Details](#) [Delete](#) 12

Delete
Purge

"Purge" only available if a work is in a DDP. Also limited by user role.

Where "Purge" stands for the function that would delete the work from the repository and the DDP.

Do you want to purge this work?
Purging a work removes it from the local repository and every DDP it is backed up to permanently.
Type "PURGE" below to confirm. The press "Yes" to proceed.

[Yes](#) [No](#)

Go to "Delete Request Status Page"

Update Hyrax "Delete" confirmation dialog to include a bit of help text to explain what is going on.

Are you sure you want to delete this work?
Deleting a work removes it from the local repository.

"Add to DDP" button displays on objects that haven't been stored in a DDP.

Clicking the button displays a confirm dialog (w/ DDP Chooser). Clicking the dialog's "Add" button initiates function to store object to default DDP.

"DDP Details" button displays when the work is either:

- In the process of being stored to a DDP, or
- Is stored in a DDP.

Clicking on "DDP Details" opens "DDP Details" modal.

DDP Statuses

1

Case "Not in DDP": N/A (I.e., Nothing should be displayed)

Case "Processing": Ingest in process (<size>). Started on <date>.

Case "Completed": Last stored to <location> on <date>.

Case "Error": Ingest error. Please see [DDP Details](#) for more information.

RE: 11
Accordion control lists versions stored. Unfolded items reveals more info about that version.

RE: 5
Accordion control lists audit items. Unfolded items reveals more info.

- Objects Views**
1. Know the status of my data (I.e., processing/completed/error) for the ingest process into a DDP
 2. Know what DDP locations my data was replicated to (this could potentially happen at the DDP level)
 3. Be able to determine which data has been sent to a DDP and when it was sent
 4. Know if the current version of a digital object is in my DDP
 5. Monitor audit events performed by the DDP
 6. Request a checksum from the DDP
 7. Restore a specific object/work from a DDP
 8. Request restoration of a specific version of an object from a DDP
 9. Record the restoration of a work or file
 10. Update the metadata or file(s) for objects/works that have been ingested into the DDP (See note)
 11. Retain prior states of an object/work and its files once they have been versioned

Aggregate Object Views
 (I.e., a listing of objects in the system based on a search or other parameters, including all objects)
 1. Be able to determine which data has been sent to a DDP and when it was sent
 2. Restore all works preserved in a DDP for a given repository system

- 2 What happens if "Restore from DDP" is selected?
- User clicks "Restore from DDP"
 - Confirm screen pops up
 - User Confirms
 - User returned to calling view
 - Calling view items display note "Item restoration in progress"

"Restore from DDP" dialog

Item Restoration

The following 4 items (105 MB) will be restored from the DDP:

- Another Work in the Wall 1 (23 MB)
- Another Work in the Wall 2 (14 MB)
- Another Work in the Wall 3 (56 MB)
- Another Work in the Wall 5 (12 MB)

Restore Cancel

The following 23 items (2305 MB) will be restored from the DDP:

- Another Work in the Wall 1 (23 MB)
- Another Work in the Wall 2 (14 MB)
- Another Work in the Wall 3 (56 MB)
- Another Work in the Wall 5 (12 MB)
- + 19 more

What do do if many items here?
 Maybe list something like "+ N more". Maybe make that expandable? Scrollable area within a viewport?

chronopolis-delta

Enable Disable

Something like this if connection managed via config files or some such.

Default DDP

Select... ▼

- chronopolis-alpha
- chronopolis-beta
- chronopolis-gamma
- chronopolis-delta

New DDP

Service Key?

Username?

Password?

Add DDP

Basically a form that lets you connect to a DDP. Whatever it ends up looking like.

Test Connection Close

Let's you see and edit DDP connection details. Whatever they are.

"Edit" auto-saves.
