Overview

I currently serve as the Director of the Office of Scholarly Communications in the Sterling C. Evans library At Texas A&M University. As Director of OSC, I am responsible for strengthening the Library's efforts in scholarly communications and open access through engagement and collaboration with the faculty across campus at Texas A&M University. In addition, we are developing library services that support interdisciplinary research teams and enhance research translation and the societal impact of Texas A&M's research.

My scientific research explored questions concerning biogeochemical processes that mediate the interactions between human society and ecosystems, including the fate and bioavailability of contaminants, natural and human perturbations of nutrient and organic carbon, and human impacts on ecosystem functioning.

VIVO es un **software de código abierto** apoyado por una comunidad y una ontología para representar la actividad académica.

VIVO permite **registrar, editar, buscar, navegar y visualizar** la actividad académica.

VIVO fomenta la **visualización** del historial académico, el **descubrimiento** de la investigación, la búsqueda de **expertos**, el análisis de redes y la **evaluación** del impacto de la investigación.

VIVO se puede **ampliar fácilmente** para dar soporte a otros ámbitos de la actividad académica.

## El enfoque de VIVO

Open Source

VIVO y todos los componentes de VIVO se proporcionan como código abierto. **Descargar en GitHub**

Descárgalo

Open Community

La comunidad VIVO está abierta a todo el mundo. Puede seguir el trabajo de VIVO en su **wiki**.

Únete

Open Data

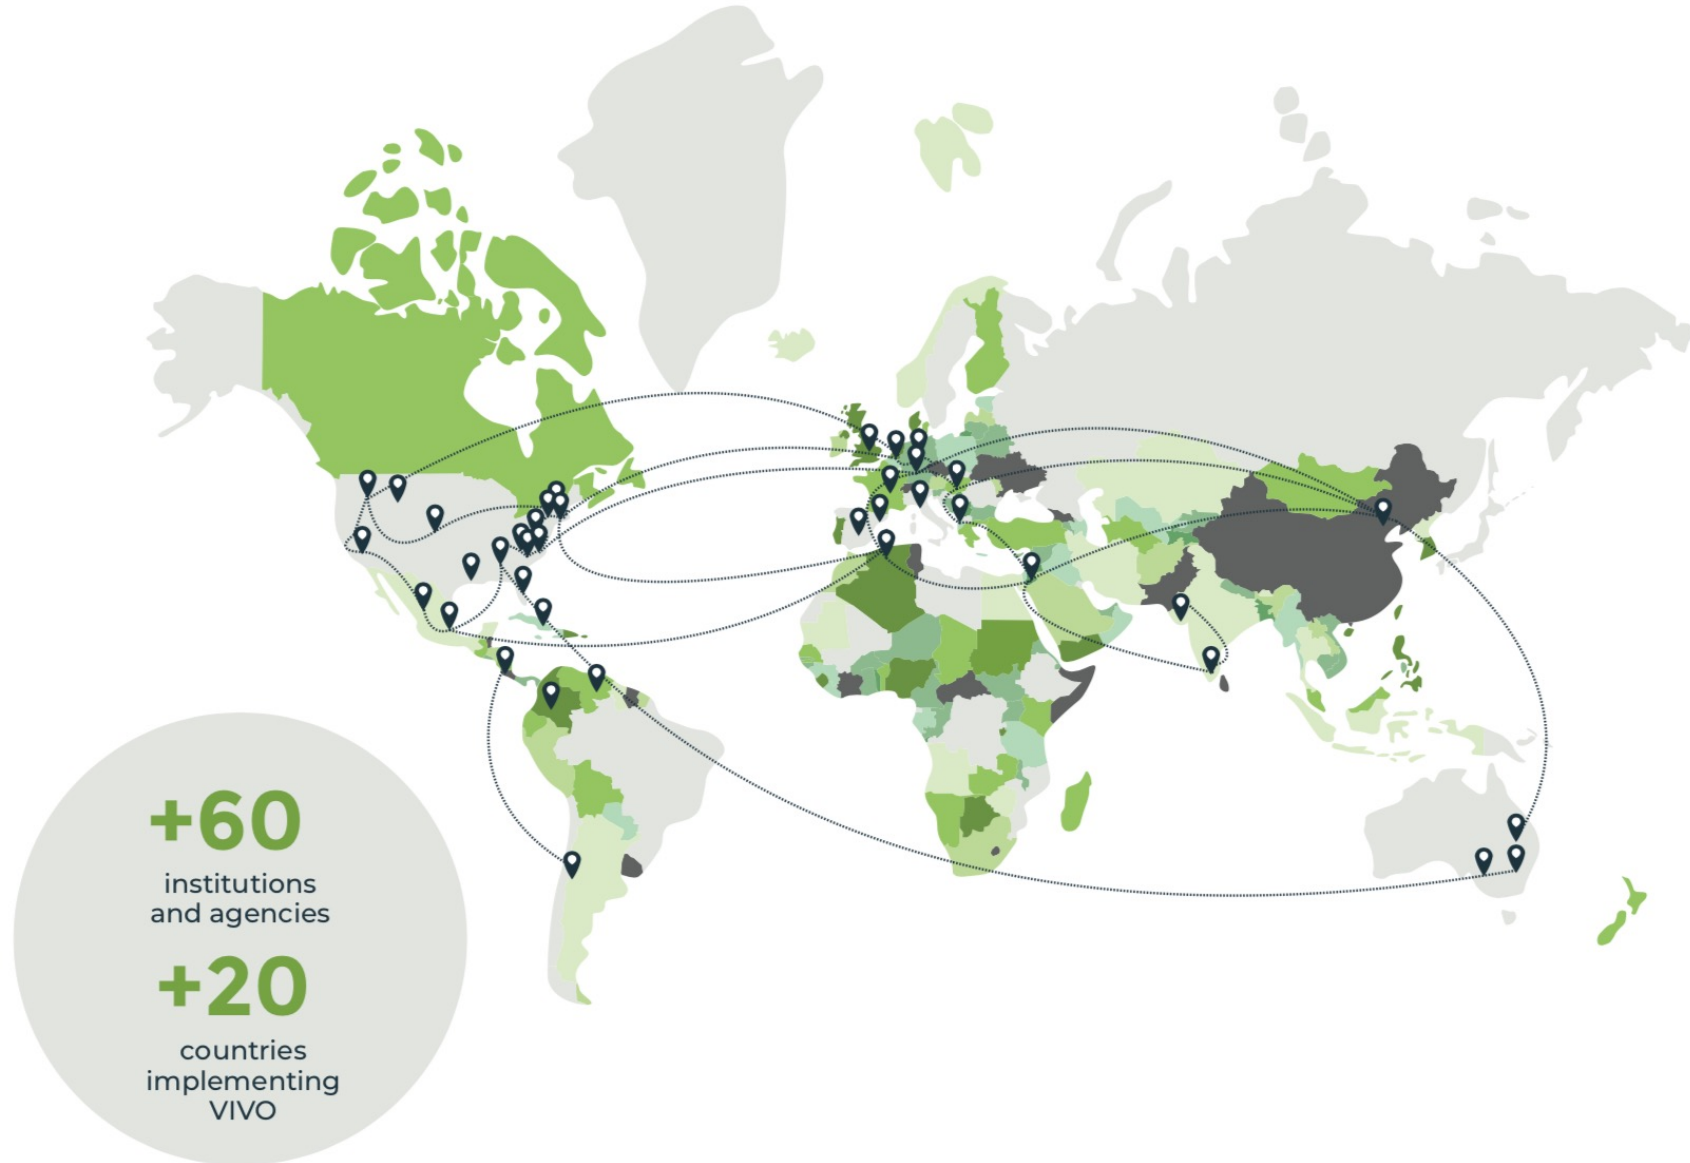

VIVO produce datos abiertos enlazados que se pueden compartir y combinar fácilmente en todos los sitios de VIVO
