dspace@domU-12-31-38-04-B0-41:~$ dspace/bin/dspace
You must provide at least one command argument
Usage: dspace [command-name] {parameters}
- checker: Run the checksum checker
- checker-emailer: Send emails related to the checksum checker
- cleanup: Remove deleted bitstreams from the assetstore
- community-filiator: Tool to manage community and sub-community relationships
- create-administrator: Create a DSpace administrator account
- curate: Perform curation tasks on DSpace objects
- dsprop: View a DSpace property from dspace.cfg
- dsrun: Run a class directly
- embargo-lifter: Embargo manager tool used to check, list and lift embargoes
- export: Export items or collections
- filter-media: Perform the media filtering to extract full text from documents and to
- generate-sitemaps: Generate search engine and html sitemaps
- harvest: Manage the OAI-PMH harvesting of external collections
- import: Import items into DSpace
- index: General index command (requires extra parameters)
- index-init: Initialise the search and browse indexes
- index-update: Update the search and browse indexes
- itemcounter: Update the item strength counts in the user interface
- itemupdate: Item update tool for altering metadata and bitstream content in items
- make-handle-config: Run the handle server simple setup command
- metadata-export: Export metadata for batch editing
- metadata-import: Import metadata after batch editing
- packager: Execute a packager
- registry-loader: Load entries into a registry
- stat-general: Compile the general statistics
- stat-initial: Compile the initial statistics
- stat-monthly: Compile the monthly statistics
The null check is broken since it will throw a NullPointerException itself. It is likely that you used || instead of & & or vice versa.

DSpace System Documentation: Installation

For the Impatient

Since some users might want to get their test version up and running as fast as possible, offered below is an unsupported outline of getting DSpace to run quickly.

Only experienced unix admins should even attempt the following without going to Section 3.3

```bash
useradd -m dspace
gunzip -c dspace-1.x-src-release.tar.gz | tar -xf -
createreuser -U postgres -d -A -P dspace
createdb -U dspace -E UNICODE dspace
cd [dspace-source]/dspace/config
vi dspace.cfg
mkdir [dspace]
chown dspace [dspace]
su - dspace
cd [dspace-source]/dspace
mvn package
cd [dspace-source]/dspace/target/dspace-<version>-build.dir
ant fresh_install
cp -r [dspace]/webapps/* [tomcat]/webapps
/etc/init.d/tomcat start
[dspace]/bin/dspace create-administrator
```
How Do We Manage This

It doesn't do it on its own.

branch of the last 1.6.... tag

yep. branch of last 1.5 and 1.6 tag -- cause I'm sure 1.5.2 no longer build either

ack -- crap. this same issue happened with 'dspace-xmui-lang' so, it also needs to be released again

and it looks like the dspace-services 'maven-metadata.xml' is also messed up, potentially: http://repo1.maven.org/maven2/org/dspace/dspace-services/maven-metadata.xml

I'm going to go to sonatype and discuss this further...

mdiggory has quit (Client Quit)

mdiggory (-mdiggory@12.0.194.4) has joined #dspace

Ok, I've passed a request to sonatype to deal with metadata issue... What I'd like to do is get the old and new metadata files merged by them and in place to replace the existing ones in central

I just did further reading and now see that there's a more flexible process for getting third party jars into the repository... This should ease future additions when they are not already in the repository

https://docs.sonatype.org/display/Repository/Uploading+3rd-party+Artifacts+to+Maven+Central

Testathon 1.7
Find, report, and squash bugs...

Test out DSpace

Posted by Peter Dietz | Filed under testathon, dspace-1.7

This is the the demo.dspace.org test site. It hosts demo installations of all DSpace web applications:

- JSPUI (traditional JSP-based interface)
- XMLUI (Manakin / XML-based interface)
- OAI-PMH Demo
  - More info on OAI-PMH protocol and its usage.
- SWORD Service Document (requires login)
  - More info on SWORD protocol and its usage.
- LNI - Lightweight Network Interface (requires login)
  - More info on the DSpace Lightweight Network Interface (LNI) and its usage.

Fix Google Scholar metatags show they display in XMLUI
The Google Scholar tags appear fine in JSPUI, but aren’t displaying in XMLUI.
View Source on: demo.dspace.org/xmlui/DRI/handle/10673/46 and also look at its DRI page.
<metadata element="citati... more
by pdietz84 in xmlui | 0 comments | Share 
Status: planned
Thank you for letting us know. We’ve gotten a basic fix for XMLUI -
https://fisheye3.atlassian.com/changelog/dspace/?cs=5784, and we’ll need to add another
change to get the Mirage theme to use this change as well.

Mirage theme is missing an invisible image
During item submission, one of the metadata field had no authority for it, so instead of having a
green thumb, the theme wants themes/Mirage/images/invisible.gif but it doesn’t exist.
Either remove the call for invisible from the theme, or add an image called invisible.gif
