

COMMUNITY ENGAGEMENT

Phase III: Assessing & Evolving Community Engagement

Activity 22: Review and Expand Infrastructure

Goals

 Revisit infrastructure to evaluate and expand how it can support nondirected community activities

Prerequisites

CE Activity 9: *ID Infrastructure for CE*

Related Activities

CE Activity 8: Determine New Forms of Community Engagement

CE Activity 13: Value Propositions for Position Descriptions

Who Should Participate?

Program management (tactical thinkers)

Length

60-90 minutes

Activity Instructions

- 1. Review original plan from CE Activity 9: *Identify Infrastructure for Community Engagement*
- 2. Compare current state to plan (you can use survey feedback or review metrics). Identify gaps to increase non-directed activities.
- 3. Identify pieces and roles community members could play (governance, active community members and less engaged community members)
 - Providing small ways to engage is an easy way to get wider engagement and lead to greater roles in the future.
- 4. Target and prioritize infrastructure that supports non-directed community activities. If program staff can create a framework, the impact can go much further. For example,
 - Encourage stakeholders to propose conference presentations by sharing calls for proposals on community lists and sharing slides that include basic platform details (that they can then expand on).
 - Provide template agendas and planning documents for local user group meetups.
- 5. Consider other infrastructure needed such as staffing or systems (see Activity 13: *Value Propositions for Position Descriptions*)
- 6. Consider a review of current system infrastructure (wiki, Facebook, website, Jira etc.)
 - Is there too much for current staff/community to support?
 - Are there too many ways to engage so that it is confusing for newcomers?
- 7. Prioritize the top 2-3 next steps (use sticker voting)
 - a. In a sticker vote, each participant is assigned a number of stickers these can be physical stickers in an in-person event or a specified piece of text (e.g. +1) in a virtual environment. Participants place their stickers or text alongside the options they're voting for, according to the parameters of the exercise (e.g. most important, most likely, most interesting, etc.).
