

GOKb: Electronic resource offerings as linked open data

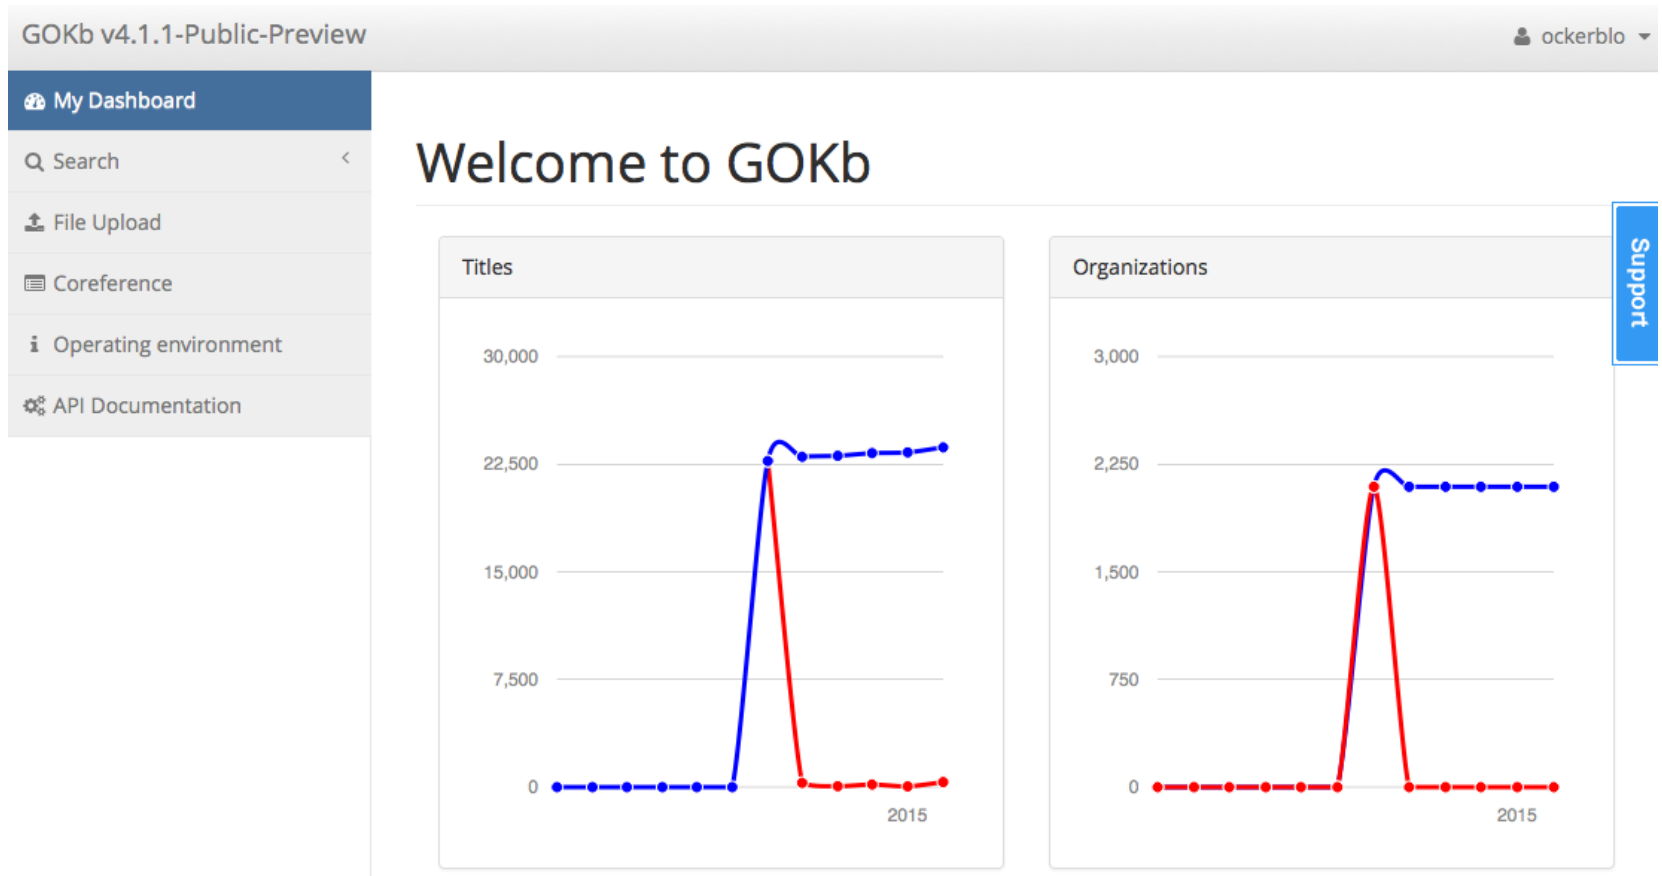

John Mark Ockerbloom
University of Pennsylvania

Linked Data for Libraries Workshop – February 24, 2015

What is GOKb?

- Global open database of electronic resources (ejournals, etc.) and packages available to libraries from various providers
- Primary audience: E-resource librarians choosing what to acquire, from where, & how
- Open license (CC0), multiple interfaces (interactive site, APIs, and soon linked data) enable reuse and recombinations

Interfaces to GOKb

TIPPs: Identifiers for titles offered on particular packages and platforms

The screenshot shows a web application interface for TIPPs. The top header includes the version 'iOKb v4.1.1-Public-Preview' and a user profile 'ockerblo'. A left sidebar contains navigation items: My Dashboard, Search, File Upload, Coreference, Operating environment, and API Documentation. The main content area displays the title 'TIPP: Elsevier: ScienceDirect Backfile Package - All of Back Files EBS / The Lancet / Elsevier ScienceDirect <Read only>'. Below the title, a list of attributes is shown: Title (The Lancet), Package (Elsevier: ScienceDirect Backfile Package - All of Back Files EBS), Platform (Elsevier ScienceDirect), Status (Current), Reference (Empty), Edit Status (In Progress), Access Start Date (Empty), and Access End Date (Empty). At the bottom, there are tabs for 'TIPP Details', 'Alternate Names 0', and 'Lists'. The 'Host Platform URL' is listed as 'http://www.sciencedirect.com/science/journal/01406736'.

GOKb

Global Open Knowledgebase

GOKb is pleased to announce a new grant from the Andrew W. Mellon Foundation that will fund the project through 2015. [See the press release](#) for more details.

GOKb is now open for public preview. To view the knowledgebase, visit <http://gokb.kuali.org/gokb> and create a free account. [More info...](#)

An enhanced knowledge base

At its core, GOKb is a knowledge base that will describe electronic journals and books, publisher packages, and platforms in a way that will be familiar to librarians who have worked with electronic resources. GOKb aims to go further
