

DSpace Anwendertreffen 21.09.2017, Stuttgart

Topic: DSpace-CRIS

Presentation by
Fraunhofer-Informationszentrum Raum und Bau IRB and
4Science S.r.l.

Part 1: DSpace-CRIS overview

- What is DSpace-CRIS
- DSpace-CRIS use cases
- New features in DSpace-CRIS 6.1
- DSpace and DSpace-CRIS
- Outlook

Part 2: DSpace-CRIS @ Fraunhofer

- Fraunhofer in a nutshell
- Science indicators @ Fraunhofer
- Why DSpace-CRIS?
- Implementation in a nutshell
- Pains & gains
- Outlook

4SCIENCE

SHARE YOUR KNOWLEDGE

Your today's research is tomorrow's science:
manage it, preserve it, share it. Now.

DSpace-CRIS Overview

An extended data model for research output

DSpace Anwendertreffen 2017, Stuttgart 21st Sept. 2017

Susanna Mornati & Andrea Bollini, www.4science.it

DSpace and “extended” DSpace

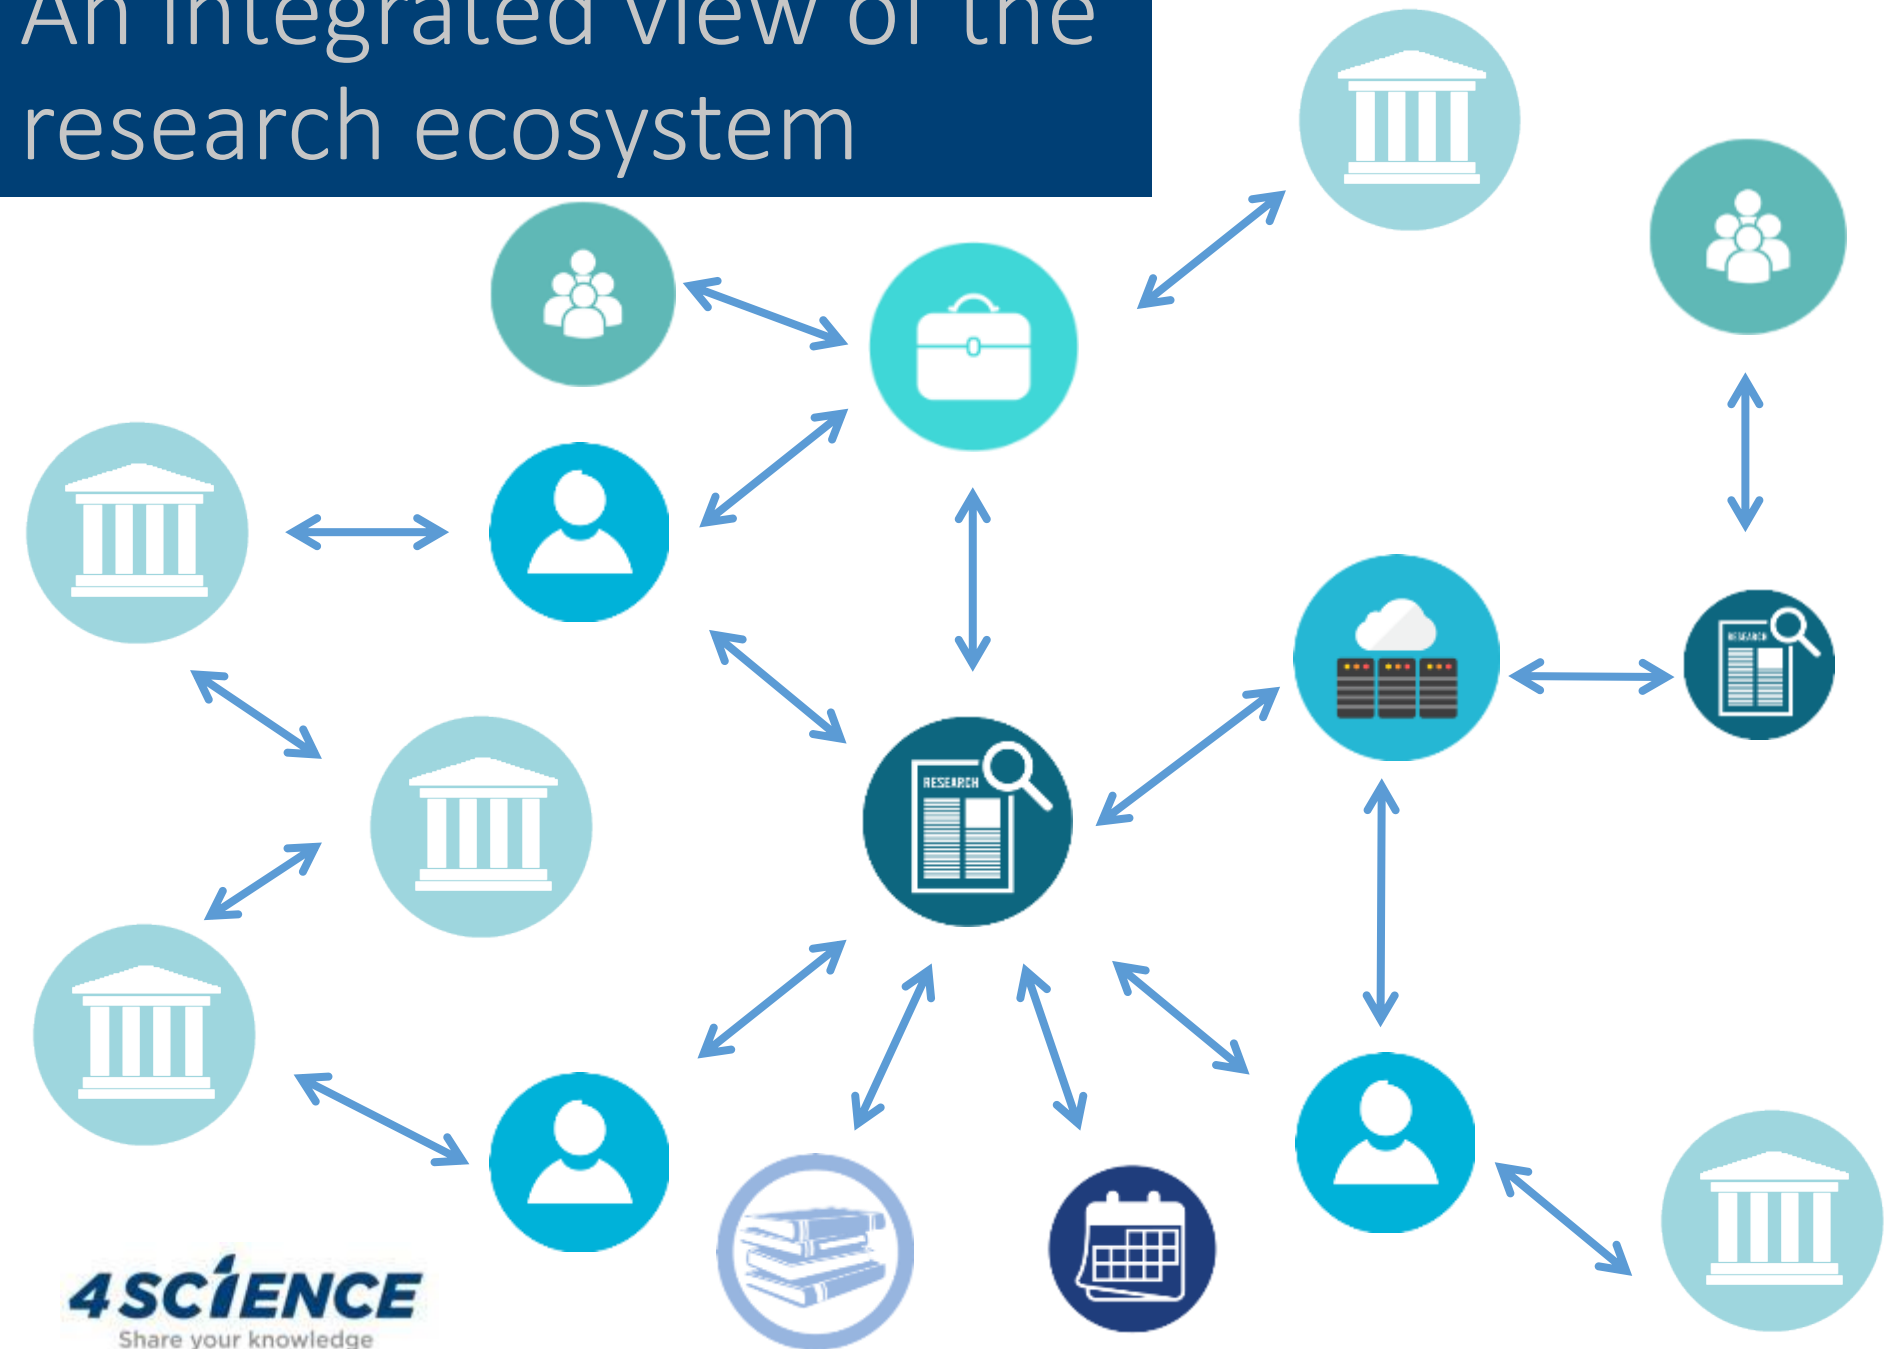

- DSpace is the most popular free open source Digital Asset Management System in the world, used for Institutional Repositories to manage publications...
- ...but more and more HE and Research Institutions are asking for Research Information & Data Management tools
- Why not using an “extended” version of DSpace to meet these two relevant needs?

DSpace-CRIS: what?

- In 2009, the team now at 4Science led by Susanna Mornati and Andrea Bollini, together with the team at Hong Kong University led by David T. Palmer, created DSpace-CRIS
- <https://wiki.duraspace.org/display/DSPACECRIS/DSpace-CRIS+Home> (documentation)
- DSpace-CRIS is an “extended” version of DSpace, with a powerful and flexible data model to describe not just publications, but all the entities that populate the research environment and their meaningful links
- <https://dspace-cris.4science.it/> (demo)

An integrated view of the research ecosystem

DSpace-CRIS: why?

- Buying a commercial platform to manage Research Information (a CRIS or RIMS) is expensive and binds your institutions to a proprietary system

- DSpace-CRIS is free, open source, compliant with open standards, and provides your institution with a sustainable and effective tool to manage research information such as researchers' profiles, department pages, project grants & awards, research outputs, metrics, reports and statistics

DSpace-CRIS: make it beautiful

- State-of-art technology for your UI (next: version 7 with AngularJS UI)
- Adaptive, responsive
- Icons for intuitive exploration
- Widgets for most viewed, most cited, etc.

The screenshot displays the Ktisis website interface. At the top, there is a dark navigation bar with links for Home, Communities & Collections, Research Outputs, Researchers, Faculty & Departments, Theses, Patents, Projects, and Help. A 'Language' dropdown is on the right, and a 'Sign on to:' button is in the bottom right corner. Below the navigation bar, the page title is 'Ktisis at Cyprus University of Technology'. A 'Welcome to Ktisis' section follows, with a paragraph describing the repository and a 'THE WORLD UNIVERSITY RANKINGS' logo. To the right is a large blue banner for 'THE YOUNGEST AMONG THE TOP EUROPEAN UNIVERSITIES' with the Cyprus University of Technology logo. Below this is a search bar with the text 'Search term...' and a search icon. Underneath the search bar are three main categories: 'People' (315), 'Faculty & Departments' (22), and 'Publications, books, articles...' (1206), each with an icon and an 'Explore' button. At the bottom, there are three columns of content: 'Recent Submissions' (featuring 'Exploring Greek-Cypriot media representations...'), 'Most Viewed' (featuring 'An analytical solution in probabilistic rock slope stability assessment...'), and 'Most Cited' (featuring 'A strong regioregularity effect in self-organizing conjugated polymer films...').

Title: A strong regioregularity effect in self-organizing conjugated polymer films and high-efficiency polythiophene: fullerene solar cells

Authors: Choulis, Stelios A. 
Kim, Youngkyoo 
Cook, Steffan 

Keywords: Polymers
Fullerenes
Nanostructured materials
Plastic films
Solar cells

Issue: 2006
Date:

Publisher: Nature

Source: Nature materials, 2006, Volume 5, Issue 3, Pages 197-203

Abstract: The influence of polymer regioregularity (RR) on the molecular nanostructure, and on the resulting material properties and device performance was analyzed. Annealed blend films show increased α regardless of RR, that indicates improved charge-carrier diffusion. It was found that the highest device efficiencies will be achieved with the highest RR P3HT. It was also found that the dark-current density of as-fabricated devices made with pristine P3HT increases with the RR of P3HT in the higher voltage regime

Profile

	Full Name	Kalogirou, Soteris A.	Greek Name	Καλογήρου, Σωτήρης	
Department	Department of Mechanical Engineering and Materials Science and Engineering				
Faculty	Faculty of Engineering and Technology				
Email	soteris.kalogirou@cut.ac.cy				
ORCID	0000-0002-3654-1437	Scopus Author ID	7005998383	Researcher ID	D-3883-2015 

Biography

Soteris Kalogirou was born in Trachonas, which is a suburb of Nicosia. He is married and has two children. He received his first Degree in Mechanical Engineering from the Higher Technical Institute (1982) his Master of Philosophy (M.Phil) in Mechanical Engineering from the Polytechnic of Wales (1991) and his Ph.D in Mechanical Engineering from the University of Glamorgan, UK (1995). In June 2011 he was awarded from the University of Glamorgan, UK the title of D.Sc. He was employed as a Building Services Consultant by the firm Intersol Engineering from 1982-1987, and in various positions in the Mechanical Engineering and Engineering Practice Departments of the Higher Technical Institute from 1987 to 2007. In 2008 he was transferred to the Cyprus University of Technology and now he is a Senior Lecturer in Mechanical Engineering. He is considered internationally as an expert in the field of solar thermal collectors and to the use of artificial intelligence techniques for the performance prediction of energy and renewable energy systems. He is member of CIBSE (Chartered Institution of Building Services Engineers),

<input type="checkbox"/>	3 2012	A detailed thermal model of a parabolic trough collector receiver	Kalogirou, Soteris A.

DSpace-CRIS: interoperability

- Save your researcher's time and provide records from ORCiD, PubMed, PubMed Europe, Scopus, WebOfScience, ArXiv, CrossRef and more... also as automatic feeds
- Import information from master legacy systems such as HR, export information to your data warehouse or your analytics solution, integrate your DSpace-CRIS with the institutional Identity Management system to control authentication and authorization, and so on...
- Import bibliometric information automatically from Scopus and Web of Science or from any other sources using spreadsheets

New features in DSpace-CRIS 6.2 [& 5.8]

- **ORCID APIs (version 2)**: integrated authentication, claim profile, exchange of data (push and pull for profiles, publications, projects)
- **CKAN integration**: an extensible viewer framework to offer data discovery, exploration, preview, sampling and visualization within the repository
- **Signposting** is an approach to make the scholarly web more friendly to machines, exposing relations as Typed Links in HTTP Link headers
- **CORE Recommender** for items, a plugin to suggest similar articles in a database of 75 million records
- Connection to VIAF records and Getty Vocabularies
- 4Science **add-ons**: IIF Image Viewer, Document viewer, OCR transcription, audio/video streaming

DSpace-CRIS: how?

- Every institution can upgrade their DSpace installation to DSpace-CRIS, extending the management of research publications by creating new entities such as Researchers and Projects
- Your publications will be safely managed as before, adding the advantage of linking them to relevant information such as authors, datasets, projects, metrics, networks, statistics and much more

DSPACE-CRIS in a nutshell

Version 5.8 & 6.2 available on GitHub

More than 80 DSpace-CRIS installations worldwide:
Asia | North America | South America | Europe | Australia | Africa

The only open-source CRIS, maintained in the context of
a vast and authoritative worldwide community.

Documentation and software available on the DSpace Wiki:

4Science: a DSpace Registered Service Provider, with two DSpace Committers, the Lead of the REST API sub-team for DSpace 7, and a member in the Steering Group

A **longtime commitment** in open source, open standards, interoperability, contributing to the most relevant international communities (CERIF TG at euroCRIS, Next Generation Repositories at COAR, etc.)

Repository Infrastructure @ Fraunhofer

FhG-Publicationinfrastructure (Technical perspective)

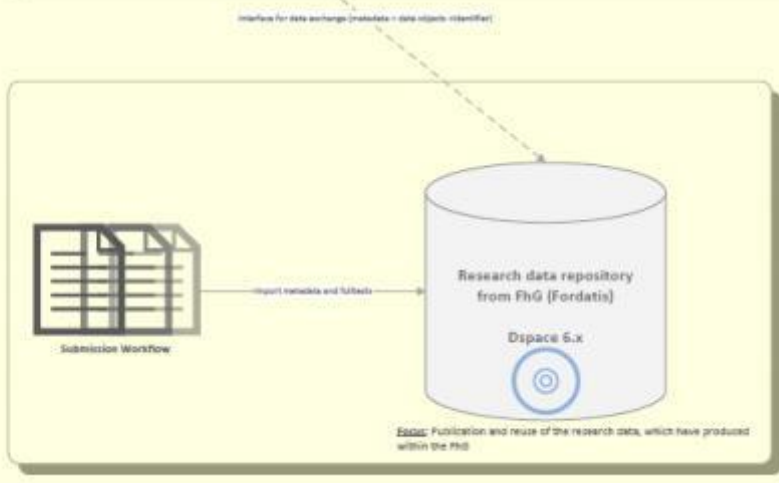

Several notifications- and submission workflows

The central part of the diagram features two screenshots of the **Publica** website:

- Left Screenshot:** Shows the 'Publica Startseite' (Home) with navigation links like 'Suchformular', 'Neue Publikationen', 'Dokumentlieferung', 'Datensport', 'Open Access-Strategie', 'Leitlinien', 'Technische Dokumentation', and 'Kontakt'. A blue box highlights 'Neue Veröffentlichungen aus den Forschungsbereichen' with a list of research areas: Werkstoffe, Bauteile, Produktion, Informations- und Kommunikationstechnik, Mikroelektronik, Oberflächen- und Plasmatechnik, Life Sciences, and Technisch-ökonomische Studien.
- Right Screenshot:** Shows a search interface with a search bar, a 'Suchen' button, and a 'Publikationsdatenbank der Fraunhofer-Gesellschaft' header. Below the search bar, it states: 'Die Datenbank "Fraunhofer-Publica" dokumentiert die Publikationen und Patente, die aus der...'.

The rightmost screenshot shows the **Fraunhofer-FIS** search interface:

- Header: 'Fraunhofer-FIS' and 'Fraunhofer' logo.
- Search bar with a 'Suchen' button.
- Text: 'Die Datenbank "Fraunhofer-Publica" dokumentiert die Publikationen und Patente, die aus der...'.

Fraunhofer Requirements

- Fast implementation
(no EU-wide tender, no additional licencing costs)
- Mapping of Fraunhofer (hierarchical) organisational structure
- Entry / import of the central / local / publica data
- Data management workflows: entry, control, approval/rejection, validation → Different user roles / permissions / privileges
- Separation of the datasets of the various institutes
- Definition / calculation and storage of indicator values
- Wide range of configuration possibilities
- Compliance with international standards (e.g. CERIF) and consideration of "Kerndatensatz Forschung" (KDSF)

Why DSpace-CRIS?

- ✓ Open Source
- ✓ Open for „all sorts“ of data entities of the research environment
- ✓ Open and flexible system architecture
- ✓ Wide range of configuration possibilities
- ✓ Allows a hierarchical organization structure
- ✓ Flexibility of indicator and data calculation („Metrics“ table)
- ✓ Different roles / privileges
- ✓ Data management workflows
- ✓ Large DSpace community and regular adjustments/enhancements of DSpace and the CRIS module
- ✓ Support & assistance on a consultancy basis available

DSpace-CRIS adaptations @ Fraunhofer:

- Additional data entities
- Separation of the various institutes' datasets
- Calculation and storage of indicators' values
- Adjustments of input forms, data display, filter possibilities
- Enhancement of the „My DSpace“ page (working area of users)
- Shortage of workflows
- “Cleansing” of web app surface and adaption into Fraunhofer look/design

Cooperation with 4Science

- Feasibility-study of Fraunhofer requirements within DSpace-CRIS
- Extensive exchange about possibilities, best ways of implementation
- Definition of data entities, indicator definitions and input form specifications
- Implementation of Alpha + Beta + 1.0 version of «Fraunhofer-FIS»
- Testing & improvement phase (including usage of 4Science ticket system)
- Online training meetings & ongoing support

Entity / Object / Table:	spokesmanship	Storage of spokesmanship in projects or funder programs			
Attribute name	Standard Label (german)	Standard Label (english)	Value type	Example	Comment
fhg_institute	"Erfassung für:"	"Data acquisition for:."	id	record_id of user's institute from table cris_orgunit	*Assigned automatically by the system with
data_collection_year	"Relevantes Erhebungsjahr"	"Relevant collection year"	number	"2016"	*Assigned automatically by the system. Should be a new collection year!
record_id	"Systeminterne Datensatz-ID"	"Internal record ID"	id		*Internal CRIS id *Assigned automatically by the system.
fhg_speaker (record_id from table cris_rpage)	"FhG Mitarbeiter"	"FhG Staff Member"	id	record_id from table cris_rpage	*Other information like name and gender can be entered manually. *What, if you have to enter a person, who is not in the dropdown list/autosuggest)? Can you enter him from dropdown list/autosuggest)? Can you enter him automatically as new entry in table cris_rpage?
speakers_category	"Art der Funktion"	"Type of Role"	digit	"1" or "2"	
funder (record_id from table cris_orgunit)	"Fördermittelgeber"	"Funding Organisation"	id	an record_id from table cris_orgunit	*What, if you have to enter an organisation which is not in the dropdown list/autosuggest)? Can you enter then automatically as new entry in table cris_orgunit?
program	"Kurzbezeichnung d. Programms"	"Short Name of Program"	string	E.g. "Forschungscampus Arena 2036" or e.g. "International Electrotechnical Commission (IEC) / IEC/TC 65/WG 14 'Energy Efficiency in Industrial Automation'"

Aufgabe ausführen

Datensatz der Datenkategorie **Projects**. Bitte begutachten Sie diesen Datensatz. Nach der Begutachtung wählen Sie bitte Zustimmung oder Ablehnen, um die Begutachtung abzuschliessen.

Art:	Project at Fraunhofer Institutes
Erhebungsjahr:	2016
Fraunhofer Institut:	Fraunhofer-Institut für Keramische Technologien und Systeme IKTS 
Validierungsstatus:	Excluded
Öffentliche Notiz:	NOTiz, sichtbar für das Institut und auch für IRB-Mitarbeiter!
Programm-Name:	ABC-123
Kategorie:	Graduiertenkolleg
Title of Project:	Testprojekt Fraunhofer IKTS
Sigma Number:	12345678
Spent Budget:	120000
Funding Organisation:	Deutsche Forschungsgemeinschaft (DFG) 
Datenkategorie:	Projects

Zustimmen

Wenn Sie einen Datensatz **positiv** begutachtet haben, wählen Sie bitte "Zustimmen".

Ablehnen

Wenn Sie einen Datensatz **negativ** begutachtet haben, wählen Sie bitte "Ablehnen". Danach werden Sie aufgefordert, die Gründe für die Ablehnung anzugeben. Diese werden dann dem Erfasser zugesandt und er hat die Möglichkeit entsprechende Änderungen an der Ressource und/oder ihren Metadaten vorzunehmen und das Dokument erneut einzureichen.

Metadaten bearbeiten

Wählen Sie diese Option, um die Metadaten zu bearbeiten.

Später erledigen

Wenn Sie die Aufgabe später erledigen wollen, wählen Sie bitte diese Option.

Zurück in Aufgabenpool

Wenn Sie eine Aufgabe wieder in den Aufgabenpool überführen wollen, wählen Sie bitte diese Option.

Pains & Gains

- Organisational structure is REALLY complex
- There is no such thing as an „easy implementation“
- Data ownership and different sources
- Fraunhofer institutes / units often change, split, merge, etc.
- Scopus is NOT an accurate database
- Institutes may complain about „YET ANOTHER COLLECTION SYSTEM“

- + Institutes are thinking about their dissemination strategies
- + Publication processes are introduced
- + Research management strategies are fostered
- + Research dissemination is being measured as KPI

Outlook

- Start pilot phase with 5 institutes → October 2017
- Evaluation of pilot phase → early 2018
- Extension & enhancement of FIS → in between
- Go-live → Q4 / 2018
