WGBH Media Library and Archives

HydraDAM
- Developed by Data Curation Experts and WGBH
- Fedora 3
- Sufia Engine, FFmpeg transcoding
- Large quantity of audio/video material
- User self depositing assets into repository.
- Batch ingest, ingest from local or FTP
- Accepts wide range of formats

Future Development
- Include option to store assets on local LTO
- Multiple ingest stations, local proxy file creation
- Migration to Fedora 4

Open Vault
- For Metadata and Proxy File Access

Future Development
- Allow admin to change metadata records
- Shared Fedora repository with:
  - HydraDAM
  - American Archive
