DSpace Release 4.0 Status

Version 4.0
DSpace 4.0 was officially released to the public on December 16, 2013.

DSpace 4.0 can be downloaded immediately at either of the following locations:

- GitHub: https://github.com/DSpace/DSpace (tag `dspace-4.0`)

See the DSpace 4.x Release Notes for more information.

Where are the Release Notes?

DSpace 4.x Release Notes have been incorporated into the DSpace 4.x documentation wiki. The content of that page, and this one, is similar, but it's not a perfect duplicate. This page is for coordinating and planning DSpace Release 4.0, and for communicating this status information to the community. The DSpace 4.x Release Notes page is a historical document, with much of the same material.

Table of Contents:

1 New features in DSpace 4.0
   1.1 Possible JIRA tickets to resolve (automated list)
2 Changes
   2.1 New Features in 4.0
   2.2 General Improvements in 4.0
   2.3 Bug Fixes in 4.0
3 Organizational Details
   3.1 Release Coordination
   3.2 Timeline and Processing
4 Contribute to DSpace

New features in DSpace 4.0

DSpace 4.0 ships with a number of new features. Certain features are automatically enabled by default while others require deliberate activation.

The following non-exhaustive list contains the major new features in 4.0 that are enabled by default:

**Discovery: Search & Browse** is now enabled by default in both XMLUI and JSPUI.

- **Note:** The Lucene/DB-based search & browse backend is still supported, but is deprecated and might be removed in a future release. Any new features should use the Discovery API instead of tying directly to Lucene, Solr or Elastic Search.

  - Discovery general enhancements
    - Solr libraries were upgraded to version 4.4 (JSPUI, XMLUI and OAI modules) - by lap
    - Solr search accent insensitive - by ab
    - Solr-based item counter - by im, ab

  - Discovery UI enhancements (both JSPUI and XMLUI)
    - Query spell checking ("did you mean") - XMLUI by kv, JSPUI by lap, ab

Contributors:

- lap - Luigi Andrea Pascarelli with the support of CINECA
- ab - Andrea Bollini with the support of CINECA
- kv - Kevin Van de Velde with the support of @mire
- im - Ivan Masár

**Bootstrap**

A new Bootstrap-based default look and feel for JSPUI (see DS-1675 for screenshots)

Kindly contributed by Andrea Bollini & Luigi Andrea Pascarelli with the support of CINECA
JSPUI new features

- Bibliographic import and lookup in Submission, by CINECA and Greek National Documentation Centre/EKT
- AJAX progress bar for file upload the submission upload step (DS-1639), by Andrea Bollini with the support of CINECA
- Sherpa/Romeo integration in the submission upload step (DS-1633), by Andrea Bollini with the support of CINECA

JSPUI porting of features previously available only on XMLUI

- Advanced Embargo feature
- Item level versioning feature
- Curation tasks administrative UI
- "Login as" feature

Kindly contributed by Keiji Suzuki & Luigi Andrea Pascarelli with the support of CINECA

UI support for metadata batch import from various bibliographic formats

- Update to Biblio-Transformation-Engine 0.9.2.2
- Added data loader for OAI-PMH
- New configuration format to support simultaneous input mappings from the various supported metadata formats
- New interface for administrators in JSPUI (for file data loaders like bibtex, csv, tsv, endnote and ris)

Kindly contributed by the Greek National Documentation Centre/EKT

SWORDv2 module update, which provides the following improvements:

- some general bug fixes including: bitstream url construction, config options, context management and connection pool, ORIGINAL bundle problem (DS-1149)
- proper METSDSpaceSIP support in both deposit and update
- proper authentication for accessing actionable bitstreams (i.e. those that can be replaced via sword), tightened security options around mediated actions, and add extra security to the access of descriptive documents (deposit receipts, statements)
- more configuration options: bundles to expose in Statements, DepositMO extensions (for individual files), and many more
- some general refactoring
- addition of 404 responses where necessary
- better support for add/replace of metadata, and how metadata updates are handled on archived items
- update to latest version of Java Server library
- new bitstream formats in the bitstream registry

Kindly contributed by Richard Jones with the support of Cottage Labs

Improved command line features

- Run commands in batch
- Display DSpace instance information including version and enabled modules (DS-1456)
- Create users from command line (DS-1355)

Kindly contributed by Mark H. Wood with the support of IUPUI University Library

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Kindly contributed by Ivan Masár and Terry Brady with the support of Georgetown University

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Kindly contributed by Claudia Jürgen with the support of TU Dortmund University

Filtering of web spiders from statistics can now match by the spider host’s DNS name or the spider’s User-Agent string.

Kindly contributed by Mark H. Wood with the support of IUPUI University Library
Several improvements to help Google Scholar better index your content (requested by Google Scholar team). See also Search Engine Optimization recommendations for further advice. Google Scholar and other search engines included.

The following list contains all features that are included in the DSpace 4.0 release, but need to be enabled manually. Review the documentation for these features carefully, especially if you are upgrading from an older version of DSpace.
### Request a Copy for JSPUI and XMLUI (DS-824)

- For items with restricted access, allows users to ask the original author for a copy of the item

Original contribution of Adán Román Ruiz (Arvo Consultores). JSPUI version adapted from the Universidade do Minho. XMLUI version funded by Instituto Oceánográfico de España. Additional improvements/bug fixes by Andrea Bollini (CINECA).

### A new REST web service API module based on Jersey (a JAX RS 1.0 implementation) (DS-1696)

Provides:
- Read-only access to unrestricted communities, collections, items and bitstreams
- Handle lookup
- JSON (and XML) output formats

Kindly contributed by Peter Dietz with the support of Ohio State University Libraries

### More Information

Additional information about DSpace 4.0 may be found in the [4.0 Documentation](#).

A full list of all changes / bug fixes in 4.0 is available in the History section of the 4.0 Documentation.

All non-commercial images in the above table are free-to-use images borrowed from elsewhere or they are logos used to identify their respective products/services. In order: magnifier icon, Apache Solr logo, Bootstrap button, Barre de progression by Mathafix (OpenClipArt), SHERPA/RoMEO logo, Copy Text by Chris Alpaerts (The Noun Project), DSpace diagram, SWORD logo, commandline logo, Package designed by Hakan Yalcin (The Noun Project), Alarm Clock (The Noun Project), flags logo, no spiders logo (created by mhwood), Google Scholar logo, DOI logo, HDL-Enabled logo, phone icon, key icon, hand holding brochure, JAX-RS logo.

### Possible JIRA tickets to resolve (automated list)

This is the list of JIRA tickets ("New Features" and Improvements) currently scheduled for 4.0. **There is no guarantee they will all be completed in time for 4.0 release, and tickets may be dropped/added to the list at any time.** But, if you'd like to volunteer to help with one, please let us know by attaching a comment to the ticket in question.

Organizational Details

Release Coordination

Instead of a single "Release Coordinator", the DSpace 4.0 release will be managed by a "Release Team".

Release Team Leader

- Mark H. Wood

Release Team Members

- Hardy Pottinger
- Mark H. Wood
- Andrea Bollini (4Science)

</table>
DSpace 4.0 is released for general use.

Release Process needs to proceed according to the following Maven release process: Release Procedure

Contribute to DSpace

On October 21st, the window for contributing new functionality to the DSpace 4 release formally closed. Bugfixes are currently still considered.

Any contribution is always welcome! Contributions of new functionality will be considered for future releases of DSpace. Code and documentation need not be finished, so long as it is working and we can all see what it is for. Time is set aside for fixing, polishing, and integration. General Code Contribution Guidelines are available. Anyone is welcome to ask questions on the dspace-devel mailing list.

Can't show details. Ask your admin to add this Jira URL to the allowlist.
