DSpace Contributors

Listed below are those who have made contributions to the DSpace open source code base or to DSpace in general.
It does not include people with uncommitted patches and many other people whose efforts have been equally important in bringing you DSpace.

DSpace Committers Group

DSpace Committers have autonomous control over the code and are also the primary support team for DSpace. The primary responsibilities of Committers are:

- Maintain the public codebase
- Review all code contributions/changes to ensure stability, etc
- Merge/accept community code contributions
- Help to resolve bugs or security issues within codebase
- Help to provide ongoing support to community developers and users (via Slack, Mailing Lists, IRC, etc.)
- Perform and manage new releases based on the roadmap.

Anyone may be nominated as a Committer by anyone else. Typically, nominations are made by existing Committers on the basis of sustained contribution to DSpace that indicates an ability to fulfill Committer responsibilities. Examples of such contribution are participation in discussions on mailing lists, Slack, IRC etc, participation in developer meetings, reporting bugs, help with testing/reviewing of code, and contribution of code via pull requests. A majority of current Committers must approve any nominations to the Committers group.

Committers

The following individuals are active Committers for DSpace open source software. (Surnames are in all caps):

- Pascal-Nicolas BECKER - The Library Code
- Andrea BOLLINI - 4Science
- Ben BOSMAN - Atmire
- Mark DIGGORY - Atmire
- Giuseppe DIGILIO - 4Science
- Tim DONOHUE - LYRASIS (Project Technical Coordinator)
- Paulo GRAÇA - FCT/FCON
- Claudia JÜRGEN - University Library of Dortmund
- Art LOWEL - Atmire
- Bram LUYTEN - Atmire
- Hrafn MALMQUIST - The University of Edinburgh
- Ivan MASÁR (aka helix84)
- Alan ORTH - ILRI
- Luigi Andrea PASCARELLI - 4Science
- Hardy POTTINGER - California Digital Library
- Andrea SCHWEER - University of Waikato ITS
- Kevin VAN DE VELDE - Atmire
- Mark WOOD - Indiana University-Purdue University Indianapolis
Emeritus Committers

Emeritus Committers are those who, for one reason or another, are no longer able to contribute code or time to DSpace on a regular basis. They are still members of the Committers Group, but are currently acting in an advisory role within the DSpace development community. As such, while Emeritus Committers may participate in active votes, their votes are considered advisory in nature.

We wish to recognize the contributions each of these individuals has made to DSpace software over the years. Their code contributions and guidance have played an integral part in helping to make DSpace what it is today.

Committer Discussions / Meetings

As much as possible, Committers ensure that all DSpace technology decisions are transparent to the developer community. (The only exception is when security issues require us to resolve them before they are publicly reported)

- All Developer Meetings are open to anyone to attend. The meeting minutes are automatically logged and publicly available.
- Technology discussions take place in the following places:
  - Weekly developer meetings
  - dspace-devel Mailing List
DSpace Issue Tracker (When discussion is related to a specific ticket. NOTE: You can subscribe to all ticket updates via the dspace-tickets mailing list.)
GitHub (When discussion is related to a specific GitHub pull request)
Occasionally on the Wiki itself, if a feature/change is just being proposed for early feedback.
• All technology decisions are made following our Developer Voting Procedures.

Contributors (to v1.x - 6.x)
As of DSpace 7 (and above), this list of Contributors is no longer maintained, as all contributors are now listed in the Release Notes for every release. However, this list is kept for historical reference & as a "Thank You" to everyone who contributed to DSpace in past releases.

This is a list of all known general contributors to DSpace software (prior to v7). These people and institutions have contributed to at least one version of DSpace. Contributions may have been in the form of: reporting a bug, fixing a bug, providing a new feature, helping with documentation, or otherwise contributing to the software product.
