DevMtg 2018-01-10

Developers Meeting on Weds, Jan 10, 2018

Today’s Meeting Times

• DSpace Developers Meeting / Backlog Hour: 15:00 UTC in #duraspace IRC or #dev-mtg Slack channel (these two channels sync all conversations)
  ◦ Please note that all meetings are publicly logged

Agenda

Quick Reminders

Friendly reminders of upcoming meetings, discussions etc

• DSpace 7 Working Group (2016-2023): Next meeting is Jan 11 at 15:00 UTC in Google Hangouts. See wiki page for meeting details and past meeting notes.
  ◦ DSpace 7 UI Mockups - Watch this page for UI/UX mockups that are currently under discussion, etc.
• DSpace Entities Working Group (2017-18): Next meeting is TBD (January 2018). See wiki page for meeting details and past meeting notes.

Discussion Topics

If you have a topic you’d like to have added to the agenda, please just add it.

1. (Ongoing Topic) DSpace 7 Status Updates for this week
   a. Team is currently concentrating on building out search, submission, authentication and MyDSpace functionality
   b. Refactoring of submission configs notes at Configuration changes in the submission process
2. (Ongoing Topic) DSpace 6.x Status Updates for this week
   a. DSpace 6.3 Release Planning is ongoing.
3. DOI field standardization: Unable to locate Jira server for this macro. It may be due to Application Link configuration.
4. Proposed DSpace Java code style: https://github.com/DSpace/DSpace/pull/1895
5. Tickets or pull requests requiring attention? (Please feel free to add any you wish to discuss under this topic)

Tabled Topics

These topics are ones we've touched on in the past and likely need to revisit (with other interested parties). If a topic below is of interest to you, say something and we’ll promote it to an agenda topic!

1. Management of database connections for DSpace going forward (7.0 and beyond). What behavior is ideal? Also see notes at DSpace Database Access
   a. In DSpace 5, each “Context” established a new DB connection. Context then committed or aborted the connection after it was done (based on results of that request). Context could also be shared between methods if a single transaction needed to perform actions across multiple methods.
   b. In DSpace 6, Hibernate manages the DB connection pool. Each thread grabs a Connection from the pool. This means two Context objects could use the same Connection if they are in the same thread. In other words, code can no longer assume each new Context() is treated as a new database transaction.
      i. Should we be making use of SessionFactory.openSession() for READ-ONLY Contexts (or any change of Context state) to ensure we are creating a new Connection (and not simply modifying the state of an existing one)? Currently we always use SessionFactory.getCurrentSession() in HibernateDBConnection, which doesn’t guarantee a new connection: https://github.com/DSpace/DSpace/blob/dspace-6_x/dspace-api/src/main/java/org/dspace/core/HibernateDBConnection.java

Ticket Summaries

1. Help us test / code review! These are tickets needing code review/testing and flagged for a future release (ordered by release & priority)
Unable to locate Jira server for this macro. It may be due to Application Link configuration.

2. Newly created tickets this week:

<table>
<thead>
<tr>
<th>key</th>
<th>summary</th>
<th>type</th>
<th>created</th>
<th>assignee</th>
<th>reporter</th>
<th>priority</th>
<th>status</th>
</tr>
</thead>
</table>

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Old, unresolved tickets with activity this week:

<table>
<thead>
<tr>
<th>key</th>
<th>summary</th>
<th>type</th>
<th>created</th>
<th>updated</th>
<th>assignee</th>
<th>reporter</th>
<th>priority</th>
<th>status</th>
</tr>
</thead>
</table>

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

4. Tickets resolved this week:

<table>
<thead>
<tr>
<th>key</th>
<th>summary</th>
<th>type</th>
<th>created</th>
<th>assignee</th>
<th>reporter</th>
<th>priority</th>
<th>status</th>
<th>resolution</th>
</tr>
</thead>
</table>

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

5. Tickets requiring review. This is the JIRA Backlog of “Received” tickets:

<table>
<thead>
<tr>
<th>key</th>
<th>summary</th>
<th>type</th>
<th>created</th>
<th>updated</th>
<th>assignee</th>
<th>reporter</th>
<th>priority</th>
<th>status</th>
</tr>
</thead>
</table>

Unable to locate Jira server for this macro. It may be due to Application Link configuration.
