IIIF at University of Edinburgh

Current Status 23rd June 2017:

- Went live with IIIF in December 2016 with Luna Imaging image server, Image API v2 [http://images.is.ed.ac.uk](http://images.is.ed.ac.uk)
- Luna creates manifests for images
- Open Seadragon integration with Skylight, which is a UI built on top of the DSpace SOLR index [http://www.collections.ed.ac.uk/iconics](http://www.collections.ed.ac.uk/iconics) & [http://www.collections.ed.ac.uk/stcecilia](http://www.collections.ed.ac.uk/stcecilia)
- Have built an annotation tool on top of IIIF Image server [https://wiki.duraspace.org/dologin.action](https://wiki.duraspace.org/dologin.action)
- Have installed Cantaloupe image server for a virtual exhibition with other universities [http://www.collections.ed.ac.uk/coimbra](http://www.collections.ed.ac.uk/coimbra)
- Have started to generate item level manifests that are being stored in DSpace
- Going to back port IIIF to our metadata games [https://librarylabs.ed.ac.uk/](https://librarylabs.ed.ac.uk/)
