  - CRIS 2024 - [https://cris2024.eurocris.org/](https://cris2024.eurocris.org/)
    - brief report

- Issues
  - vivo-solr issue reported by Tom Misilio
    - docker - Solr 7.x (log4j)
  - Upload of images reported by Benjamin Gross
    - * Anyone having trouble with image uploads with recent versions of VIVO? I'm getting these errors in the logs:

    Wondering if its somehow related to the new enhanced permissions rules?

- Depositing releases on Zenodo
  - [https://github.com/vivo-project/VIVO/pull/247#issuecomment-2122036907](https://github.com/vivo-project/VIVO/pull/247#issuecomment-2122036907)
**Notes**

Dragan introduced Bridget Almas, the new director of operations for community-supported technologies at Lyrasis, who took over Lauri’s role who should focus on higher-level issues. Bridget, a software developer with a background in open-source projects, offered to contribute her technical expertise to the Vivo project. Other members of the VIVO community introduced themselves.

**CRIS 2024 conference**

https://cris2024.eurocris.org/

Dragan briefly reported about the event with almost 200 participants. There were a couple of VIVO community members. The VIVO platform has been mentioned in a couple of presentations including the “VIVO new features” presentation presented by Dragan and Michelle Mennielli. Some event participants expressed the interest to join the VIVO community.

**vivo-solr issue**

This has been reported by Tom Misilio. The issue is linked with Docker which is running Solr 7.x which is using the log4j version affected by a security vulnerability. There is a branch which is mitigating this vulnerability - https://github.com/vivo-project/vivo-solr/commits/solr-8.11/. Dragan informed Tom about this branch.

**The Upload of images issue**

The issue has been reported by Benjamin Gross via Slack. The issue might be linked with the new role management system. Dragan will talk with Georgy about this. https://github.com/vivo-project/VIVO/issues/3987

**JIRA tickets links**

Santhosh Anand Ramia reported broken links at https://wiki.lyrasis.org/display/VIVODOC111x/Release+Notes. JIRA tickets are in read only mode, because we switched to GitHub tickets in 2022. However, we need access to JIRA tickets for older versions of releases. The JIRA tickets were not public, Dragan fixed this. Santhosh confirmed this is fixed (accessible) now.

**Solr vs ElasticSearch**

Dragan and Michele discussed whether Solr can be replaced with ElasticSearch. It should be possible and it might be that the University of Colorado (Don Elsborg) is using that. Dragan will try to contact Don to find more information.

**Depositing releases on Zenodo**

Is there any sense in publishing VIVO releases also in Zenodo (not just in maven repository and in GitHub). There is some sense in terms of citation and assigning DOI. Dragan investigate integration of github and Zenodo for automatic depositing VIVO releases in Zenodo.

https://github.com/vivo-project/VIVO/pull/247#issuecomment-2122036907

**#reviewers channel**

The channel is growing, which is a great news.

**Draft notes in Google Docs**
