### Status updates and planning

- Based on the tech call this past week we can anticipate questions about the input/output of Casalini conversions. How do we want to staff this? What are Cornell's goals with the Casalini data?
  - For Sinopia - for copy cataloging work we need this data in DAVE/QA and in Sinopia. We understand data cleanup issues with current Share-VDE data
  - For Enhanced Discovery - need to scope work
  - Other local use - are there URIs that are useful and might be added to catalog? Need to first assess this. ACTION - Jason will discuss in LTS
- Discovery developer search – options?
  - Mention knowledge graph / other cool terms in job ad
- Authority Lookups for Sinopia (Production QA instance: https://github.com/ld4p/qa_server/issues/)
- Prep for Cataloging Sinatra and other 45's (Discogs data, https://github.com/ld4p/qa_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs)
- Enhanced Discovery
  - Steven notes that there is now a W3C BF to schema working group, may help in providing an agreed upon set of mappings
- Travel and meetings
  - LD4P2 Cornell Meeting Attendances
  - LD4 conference
    - ANYONE who wants to speak must submit a presentation and there are no guarantees that partner submissions will be accepted
    - Lynette to ping Dave about possible QA/DAVE presentation
    - Huda to discuss with Astrid possibility of UX presentation
    - Possible discussions around wikidata
