With support from the Andrew W. Mellon Foundation, the Linked Data for Production Phase 2 (LD4P2) partners (Cornell University, Harvard University, Stanford University, and the University of Iowa's School of Library and Information Science), in collaboration with the Library of Congress and the Program for Cooperative Cataloging (PCC), are building a pathway for the cataloging community to begin shifting to linked data to describe library resources. LD4P2 builds on the foundational work of [Linked Data for Production \(LD4P\) Phase 1](#) and [Linked Data for Libraries Labs \(LD4L Labs\)](#). More on [LD4P2 Project Background and Goals](#).
