Resource: Books

This page is meant as a collection of books and related resources, available in print and often online, that are useful to VIVO and Semantic Web developers and implementors. This is not advertisement space, and is open to all suggestions from the community.

Concepts

Technical

- Programming the Semantic Web (O'Reilly) Toby Segaran, Colin Evans, Jamie Taylor
- Semantic Web Programming (Wiley) John Hebeler, Matthew Fisher, Ryan Blace, Andrew Perez-Lopez
