Notes

[Draft notes in Google-Doc](#)

- Review of agenda
 - None
- Project directions
 - Brief introduction and discussion
- December sprint - (Dec 3 - 7)
 - Institutions present in the LG would like to have more implication in development
- Housekeeping
 - Moving the Advanced Role Management feature forward
 - The team is called to help finish the PRs related to advance Role Management in case Graham does not have time to complete it.
 - Vagrant
 - Updating to 1.10 ([issue-41](#))
 - Don might complete this issue by next week
 - Triple Pattern Fragments
 - [VIVO-1614](#) - Make visibility of TPF server configurable Open
 - Don thinks the feature should be disabled by default
 - Jim thinks it should be open. The TPF do not allow same exposure as SPARQL End point.
 - Huda: what do we want to implement, we need to clarify
 - Ralph: VIVO is meant for sharing data and not hide them.
 - Kitio: we need some consistency between all API. If data are not open by default on a fresh install SPARQL End point then the user would be surprised to have them available on TPF.
 - Don & Huda: We have two issues
 - Default setting
 - Making it more configurable in visibility settings
 - Andrew : How to apply various authorisations on TPF request ?
 - Jim: Filters are applied to data when you request them on the SPARQL End Point, the same should be doable for TPF.
 - Alex: Has anyone got in touch with TPF community. Get some best practices that could help for implementing ACL on TPF?
 - Themes
 - [VIVO-1543](#) - Top level page.ftl includes file that does not exist Open
 - Kitio to work on this ticket
- Action:
 - Don: to make the differences between Vitro and VIVO properties files.

Actions

- [Andrew Woods](#) to submit PR to <https://github.com/vivo-community/vivo-vagrant/pull/38> to remove whitespace updates
- [Kitio Fofack](#) to work  [VIVO-1543](#) - Top level page.ftl includes file that does not exist CLOSED
- [Don Elsborg](#) to investigate rationale for retaining two nearly identical propStatement-dataDefault.ftl files in VIVO and Vitro
- [Kitio Fofack](#) to review  [VIVO-1620](#) - Faster AuthenticateTest (reduce Argon hashing overhead) CLOSED

Previous Actions

- [Don Elsborg](#) - add jira tickets for abox/tbox use cases - one ticket for each use case
- [Brian Lowe](#) - check with ontology group on handles

- [Alex Viggio](#) will bring news of Elasticsearch instead of Solr up with Product Evolution.
- [Benjamin Gross](#) to create new Jira issue for additional errors thrown startup.
- Don Elsborg - create Jira ticket for data property linking by default
- [Don Elsborg](#) - discuss his data property linking pull request with the ontology group
