

Annual Reports

Since its inception in 2008, this community has evolved from a loose consortium of a few like-minded people into a thriving organization comprising many, many hundreds of people worldwide. As Samvera, previously Hydra, has grown it has become more difficult for any one individual to keep track of all that is going on in, and all that has been achieved by, that Community. In late 2016 it was decided that we would be well served by publishing an Annual Report each year to summarize our achievements both for those in the Community itself and for those who may be looking to find out more about it.
