Create, Assign, and Use an Institutional Internal Class

- Overview
- Create an Institutional Internal Class
- Assign your Institutional Internal Class
- Use your Institutional Internal Class

Overview

VIVO supports the concept of an Institutional Internal Class, a class that you can create and assign to your people, and other entities, to indicate that they are part of your institution. Using an Institutional Internal Class, you can limit VIVO’s displays of entities to those in your institution.

Create an Institutional Internal Class

Create a local ontology if you do not already have one. If you have one, add a class to your existing local ontology.

Go to Site Admin > Ontology list > Add new ontology

Add your new ontology (see the example below)

Create a new ontology:

- **Ontology name**: Whatever you want. The name you give will appear in the list of VIVO ontologies.
- **Namespace URI**: Must begin with `http://` or `https://`, followed by `/ontology/` followed by a name of your choice, followed by the `#` sign.

Add a new class:

Go to `Hierarchy of Classes Defined in This Namespace` > Add New Class

Add your new class (see the example below)
Class label: Text, describes the class. This will be visible on the VIVO interface.

Class Group: People. This allows the class to be used to restrict the display of people to those people who have the institutional class you are defining.

Ontology: Select your previously created local ontology from the drop down menu

Internal Name: This word will be used in your SPARQL queries, along with the local ontology prefix to refer to your local class. In this example, the complete reference in SPARQL would be vlocal:MyEntity.

Short definition to display publicly: Use language your users will understand

Example for ontology editors: More detail. Can be very technical.

Description for ontology editors: Will appear in the ontology editor. Remind future ontology editors of the purpose of the class and how one will know what entities should be in the class.

Display level: Set to editor and above from the drop down

Update level: Set to curator and above from the drop down

Publish level: All users including public

Once you are satisfied with the values, press Create New Record

Assign your Institutional Internal Class

Method 1: (Manual)

Go to the person in the UI

Click Edit Individual

Click Add Type

Select your Institutional Internal Class from the drop down

Method 2: (Bulk)

Create a set of RDF, one triple per person you would like to have in the institutional class. Each triple will look like

<personuri> rdf:type vlocal:MyEntity .

<personuri> rdf:type vlocal:MyEntity .
Go to Site Admin -> Add/remove RDF Data and add your triples

**Use your Institutional Internal Class**

Define institutional internal class

- Go to Site Admin > Institutional internal class
- Select your new class from the dropdown menu

To restrict display to only those people in your institution,

- Go to Site Admin > Page Management > People
- Click the plus sign to expand the ‘Browse Class Group’ box
- Check ‘Only display people within my institution’
- Click "Save this Content"
