2019-07-11 DSpace 7 Working Group Meeting

- **Date**
  11 Jul 2019 from 14:00-15:00 UTC
- **Location:** https://duraspace.zoom.us/my/dspace (Meeting ID: 502 527 3040).
  - More connection options available at DSpace Meeting Room
- **Agenda**
  - (15 mins) Developer Stand Up - Developers give brief updates on their effort (or their team's effort).
    - Update/see "Current Work" section below based on your status. Please feel free to update prior to meeting.
    - Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
  - (30 mins) General Discussion Topics
    1. (Topic #1) Short mention from Andrea Bollini (4Science) about the strategy to adopt to manage relations (entities) in the submission. The expectation is to enhance/update the workspaceitem endpoint as required but to don't use directly the item endpoint (i.e. /api/core/items/:uuid/relations). As soon a design document/PR/idea is ready Andrea Bollini (4Science) will be happy to provide feedback, please just ping Andrea Bollini (4Science) 
    2. (Topic #2) (Used time for a deeper discussion of outstanding PR)
      - Improved Estimation Strategy for Beta release. (Estimates should include time for discussion / code reviews, also should be done by multiple developers)
        - Development Planning Spreadsheet needs to be updated, so that we can determine what (outstanding) tasks need estimation.
        - Will be using Wideband Delphi estimation technique
  - (15 mins) Planning for next week
    - Assigning PRs for Review
    - Next tasks from Development Planning Spreadsheet
- **Attendees**
  - Art Lowel (Atmire)
  - Andrea Bollini (4Science)
  - Tim Donohue
  - Heather Greer Klein
  - Lieven Droogmans
  - Mark H. Wood
  - Giuseppe Digilio (4Science)
  - Ben Bosman
  - Pascal-Nicolas Becker
  - Chris Wiper
  - Terrence W Brady
  - Pablo Prieto
  - Paulo Graça
  - Bill Tantzen

**Current Work**
Legend for status icons

⭐ = Highest Priority tasks (please prioritize these reviews/tasks over others). Currently this list lists tasks/features that need to be completed for Preview Release.

⭐ = Priority for OR2019 (Preview #2 Release).

⚠️ = review done (this week), changes were requested.

✓ = review done, approved.

⚠️ = review done, merge conflict or other minor changes requested

Tickets / PRs In Progress

1. (Angular) Adding Accessibility via Travis CI https://github.com/DSpace/dspace-angular/pull/356 (work in progress) (Lower priority)
3. (REST Contract) Edit Homepage news: https://github.com/DSpace/Rest7Contract/pull/245 (Ben Bosman - has outstanding questions/comments) (Lower priority)
4. (REST) DS-4043: Revisit the security layer of the submission (work in progress) Andrea Bollini (4Science)
5. (REST Contract) Group and eperson management: https://github.com/DSpace/Rest7Contract/pull/41 (Waiting on updates from Ben Bosman)
6. (REST) Pagination issues on Items findAll - https://github.com/DSpace/DSpace/pull/2406 (Waiting for confirmation of proposed approach by Andrea Bollini (4Science) from Kevin Van de Velde (Atmire) and any other interested/available)
7. (Backend) DS-4257: Renaming "dspace-spring-rest" to "dspace-server" (Tim Donohue). (Timeline: Not likely to be completed until after OR2019)
8. (NEW) (Angular) Shibboleth Login https://github.com/DSpace/dspace-angular/pull/417 (there are Travis CI errors)
9. (Angular) Transfer to .po message format - Initial PR: https://github.com/DSpace/dspace-angular/pull/366

PRs Needing Review

1. (REST Contract) Collecting statistics - https://github.com/DSpace/Rest7Contract/pull/63 (Dimitris Pierrakos, Andrea Bollini (4Science))
2. (REST) Item Mapper functionality: https://github.com/DSpace/DSpace/pull/2282 (Tim Donohue, Ben Bosman - resolve merge conflicts)
3. (REST) DS-4223 Metadata Schemas for configurable entities https://github.com/DSpace/DSpace/pull/2443 (Paulo Graça, Mark H. Wood)
4. (Higher priority) (REST) [DS-4266] bitstream format registry https://github.com/DSpace/DSpace/pull/2442 (Ben Bosman, Andrea Bollini (4Science))
5. (REST) Pagination bug with withdrawn items: https://github.com/DSpace/DSpace/pull/2406 (Dimitris Pierrakos, Ben Bosman - Feedback provided)
6. (REST) DS-4298] changed the PathVariable for the upload method: https://github.com/DSpace/DSpace/pull/2467 (Ben Bosman, Tim Donohue)
7. (Angular) (Entities) Deleting relationships: https://github.com/DSpace/dspace-angular/pull/419 (Paulo Graça, Tim Donohue, tested by Laura Henze)
8. (Angular) (Entities) DS-4223 Metadata Schemas for configurable entities https://github.com/DSpace/DSpace/pull/420 (Paulo Graça, Ti m Donohue)
10. (Angular) Move Item Component: https://github.com/DSpace/dspace-angular/pull/335 (Giuseppe Digilio (4Science), NEEDS SECOND REVIEWER)
11. (Angular) Item-Collection Mapper: https://github.com/DSpace/dspace-angular/pull/348 (NEEDS REVIEWERS)
   a. Uses DSpace PR#2282 (see above)
13. (Angular) Shibboleth integration support (WORK IN PROGRESS): https://github.com/DSpace/dspace-angular/pull/429 (Julius is looking for feedback/help) (Giuseppe Digilio (4Science) needs a rebase of branch), Fernando FCT/FCCN - does this PR really have more than 1600 files changed?
14. (Backend) Upgrading to Handle Server v9: https://github.com/DSpace/DSpace/pull/2394 (Mark H. Wood, Ben Bosman)
15. (Backend) Update email templates to use Velocity (for richer, powerful templates): https://github.com/DSpace/DSpace/pull/1992 (Chris Wilper, Tim Donohue, Art Lowell (Atmire))
16. (Merge on/around July 19th) (Backend) One Webapp Phase 2: Rename "dspace-spring-rest" to "dspace-server-webapp": https://github.com/DSpace/DSpace/pull/2459

PRs Merged this week!

1. (REST Contract) upload bitstream to archived item - https://github.com/DSpace/Rest7Contract/pull/61
2. (REST Contract) Document need to escape special characters - https://github.com/DSpace/Rest7Contract/pull/58
3. (REST) Some minor code cleanup in the tests: https://github.com/DSpace/DSpace/pull/2448
4. (REST) (Entities) Relationship search by label: https://github.com/DSpace/DSpace/pull/2450
5. (REST) DS-4244 Add configurable entities unit tests https://github.com/DSpace/DSpace/pull/2446
6. (REST) DS-4210 Deposit on collection without workflow seems to fail (405 but succeed): https://github.com/DSpace/DSpace/pull/2429
7. (RECE) DS-4249 Deposit on collection without workflow seems to fail: https://github.com/DSpace/DSpace/pull/2451
8. (REST) DS-4257 Rename "dspace-spring-rest" to "dspace-server" (Tim Donohue)
9. (Backend) Our extensive EHCache configuration is ignored: https://github.com/DSpace/DSpace/pull/2397
Blocked

1. (Blocked PRs go here)

Delayed / Needs Discussion

1. Initial Performance Testing from Chris. Needs detailed discussion in a future meeting
   - [https://cwilper.github.io/dspace-perfests](https://cwilper.github.io/dspace-perfests)
2. (REST Contract) Edit Homepage News:
   - [https://github.com/DSpace/Rest7Contract/pull/45](https://github.com/DSpace/Rest7Contract/pull/45)
   a. Delayed until after Preview release. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
   b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
   c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
3. (REST) Scripts & Processes endpoint: [https://github.com/DSpace/Rest7Contract/pull/17](https://github.com/DSpace/Rest7Contract/pull/17)
4. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
   a. We’ve decided (in meeting on March 7, 2019) to use ETags to implement concurrency. REST Contract notes on ETags: [https://github.com/DSpace/Rest7Contract#etags--conditional-headers](https://github.com/DSpace/Rest7Contract#etags--conditional-headers)
   b. ETags only update of the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
   c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.
5. Not discussed much, but could there be opportunities to use Travis CI + Docker Compose for testing of Angular??
   - Docs: [https://docs.travis-ci.com/user/docker/#using-docker-compose](https://docs.travis-ci.com/user/docker/#using-docker-compose)
   - An example travis.yml file: [https://github.com/Ortus-Solutions/docker-buildfiles/blob/master/.travis.example.yml](https://github.com/Ortus-Solutions/docker-buildfiles/blob/master/.travis.example.yml)

Notes

- Most of meeting involved a detailed walkthrough/assignment of outstanding PRs (in order to move them forward ASAP). Notes are inline above.
