2020-01-16 DSpace 7 Working Group Meeting

Date
16 Jan 2020 from 15:00-16:00 UTC
Location: https://lyrasis.zoom.us/my/dspace (Meeting ID: 502 527 3040).
• More connection options available at DSpace Meeting Room

Agenda
• (15 mins) Developer Stand Up - Developers give brief updates on their effort (or their team’s effort).
  • Update/see “Current Work” section below based on your status. Please feel free to update prior to meeting.
  • Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
• (30 mins) General Discussion Topics
  1. Open Repositories 2020 Proposals due on Tues, Jan 21
     a. Who will be attending from this team? Who is submitting a Proposal already?
     b. Possible OR2020 Proposals
        i. Workshop: Getting Started with / Upgrading to DSpace 7.0
        ii. Series of DSpace 7.0 talks (similar to OR2019)?
            1. DSpace 7 overview
            2. Configurable Entities
            3. Submission & Workflow
            4. REST API
            5. Angular UI
  2. Discussion / Prep for 7.0beta2 tasks in DSpace 7 Release Plan spreadsheet
     a. What are the next steps for REST Authorization? (This is a major dependency for several other tasks scheduled for 7.0beta2)
     b. Anyone interested/ready to start
• (Other Topics?)
• (15 mins) Planning for next week
  • Assigning PRs for Review

Attendees
• Art Lowel (Atmire)
• Andrea Bollini (4Science)
• Tim Donohue
• Lieven Droogmans
• Mark H. Wood
• Giuseppe Digilio (4Science)
• Ben Bosman
• Chris Wilper
• Paulo Graça
• Dimitris Pierrakos
• Julius Gruber
• Laura Henze
• Pascal-Nicolas Becker

7.0 Release Goals (tentative)
The final list of tasks to complete are listed in our DSpace 7 Release Plan spreadsheet. This spreadsheet also lists which features are scheduled for each Beta release.

Below are the very rough 7.x Release Goals. Keep in mind, these timelines may shift (backwards or forwards) based on our available developer resources and/or community volunteers.
• 7.0 Beta 1 (goal: Feb 2020) - Security, Performance and Browse updates
• 7.0 Beta 3 (goal: Apr 2020): Account Profiles, Submission/Workflow enhancements, Administrative tools
• 7.0 Beta 4 (goal: May 2020): SEO enhancements, Theming enhancements, Batch processing, Solr-based Statistics, GDPR
• 7.0 Beta 5 (goal: June 2020, if necessary): May be optional, pending results of prior Betas. This beta is an opportunity for general bug fixing & cleanup before the final release. Might include finishing up any unfinished features (e.g. Configurable Entities or OpenAIREv4). Might also include resolving outstanding major bugs, documentation, etc. Scope to be determined in or around April.
• 7.0 Final release: Will be released as soon as all Betas have been completed & any outstanding bugs have been resolved. Perhaps 1-2 months after last Beta.

Current Work

Claim a Ticket!

If you do not have access in JIRA or GitHub to officially claim the ticket you wish to work on, contact Tim Donohue

PRs Needing Review

1. (REST Contract) Group and eperson management: https://github.com/DSpace/Rest7Contract/pull/41 (Tim Donohue - feedback provided, Andrea Bollini (4Science) - feedback provided)
2. (NEW) (REST Contract) Versioning https://github.com/DSpace/Rest7Contract/pull/97 (Andrea Bollini (4Science), Tim Donohue)
3. (NEW) (REST Contract - quick win) replace 400 with 422 for missing required or invalid parameters https://github.com/DSpace/Rest7Contract/pull/98
4. (REST) DS-4389 improving patch system framework Part 1 https://github.com/DSpace/DSpace/pull/2591 (Andrea Bollini (4Science), Tim Donohue - REREVIEW, Michael Spalli - NEEDS FEEDBACK)
5. (REST) Initial Implementation of Resource Policies endpoint: https://github.com/DSpace/DSpace/pull/2604 (Ben Bosman - Bugs found, Tim Donohue - Bugs found, Andrea Bollini (4Science))
6. (REST) [DS 4287] Refactoring the IndexableObject & SolrServiceImpl https://github.com/DSpace/DSpace/pull/2612 (Ben Bosman, Tim Donohue - noted Solr Schema updates are needed)
7. (REST) Projections continued: https://github.com/DSpace/DSpace/pull/2625 (Ben Bosman, Tim Donohue)
8. (Angular) Projections continued (merge with REST PR #2625): https://github.com/DSpace/dspace-angular/pull/548
9. (Angular) Shibboleth integration support: https://github.com/DSpace/dspace-angular/pull/429 (Giuseppe Digilio (4Science) reviewed again fixed error with yarn start, Fernando FCT/FCCN, Paulo Graça - feedback provided)
11. (NEW) (Angular) Header search box https://github.com/DSpace/dspace-angular/pull/559
12. (NEW) (Angular) Verify whether file uploads are mandatory https://github.com/DSpace/dspace-angular/pull/552
13. (NEW) (Angular) Display the entity type in MyDSpace https://github.com/DSpace/dspace-angular/pull/564
15. (NEW) (Angular) Submit this collection https://github.com/DSpace/dspace-angular/pull/566

Scope to be determined in or around April.

7.1 Release (timeline TBD): Will include all features flagged as "7.1final" in Release Plan spreadsheet which were not completed in time for 7.0

7.2 Release (timeline TBD): Will include all features flagged as "7.2final" in Release Plan spreadsheet which were not completed in time for 7.1
17. (Backend) dspace.bat file: [https://github.com/DSpace/DSpace/pull/2544](https://github.com/DSpace/DSpace/pull/2544) 1 APPROVAL (Tim Donohue - verified on Windows. One minor change needed: Mark H. Wood, Alexander Sulfrian, Chris Wilper, Andrea Bollini (4Science) verified on linux)

18. (Backend) [DS-4239] Migrate the workflow.xml to spring [https://github.com/DSpace/DSpace/pull/2420](https://github.com/DSpace/DSpace/pull/2420) (Ben Bosman, Tim Donohue)

19. (NEEDS HELP) (Backend) Java 11 upgrade: [https://github.com/DSpace/DSpace/pull/2611](https://github.com/DSpace/DSpace/pull/2611) (Tim Donohue is working on an updated PR)

20. (NEW) (Backend) Remove GeoIP download Ant target, reconfigure for external provision: [https://github.com/DSpace/DSpace/pull/2632](https://github.com/DSpace/DSpace/pull/2632) (Chris Wilper, Tim Donohue)

21. (NEW) (Backend) Remove support for multiple ServiceManagers: [https://github.com/DSpace/DSpace/pull/2496](https://github.com/DSpace/DSpace/pull/2496) (Tim Donohue, Chris Wilper, Kevin Van de Velde (Atmire))

PRs Merged this week!

1. [✓](https://github.com/DSpace/DSpace/pull/2544) (REST Contract) Workflow actions (update) 1 APPROVAL [https://github.com/DSpace/Rest7Contract/pull/96](https://github.com/DSpace/Rest7Contract/pull/96)
2. [✓](https://github.com/DSpace/DSpace/pull/2420) ★ (Angular) Upgrade to angular 7 [https://github.com/DSpace/dspace-angular/pull/547](https://github.com/DSpace/dspace-angular/pull/547)
3. [✓](https://github.com/DSpace/DSpace/pull/2611) (Backend) Minor dependency updates to resolve GitHub security alerts 1 APPROVAL [https://github.com/DSpace/DSpace/pull/2637](https://github.com/DSpace/DSpace/pull/2637)
4. [✓](https://github.com/DSpace/DSpace/pull/2420) (REST) Bug in ViewEvents 1 APPROVAL [https://github.com/DSpace/DSpace/pull/2638](https://github.com/DSpace/DSpace/pull/2638)
5. [✓](https://github.com/DSpace/DSpace/pull/2496) (Angular) Pagination of SubCommunities/Collections on Community page 1 APPROVAL [https://github.com/DSpace/dspace-angular/pull/551](https://github.com/DSpace/dspace-angular/pull/551)

Blocked

1. (Blocked PRs go here)

Delayed / Needs Discussion

1. **Managing Authorization info in Angular UI**: How to pass Authorization rights (i.e. logged in user’s access rights) from REST API to Angular? See for example: [https://github.com/DSpace/dspace-angular/issues/393](https://github.com/DSpace/dspace-angular/issues/393)
   a. In July 25 meeting, we noted this probably cannot be resolved with just one simple solution. May need to look at different options for different scenarios
   b. Work is ongoing, but has been started in these areas:
      i. Summary of ideas: [REST Authorization](https://github.com/DSpace/Rest7Contract/pull/92)
      ii. Contract for Authorization Endpoints: [https://github.com/DSpace/Rest7Contract/pull/92](https://github.com/DSpace/Rest7Contract/pull/92)
      iii. Contract for ResourcePolicies: [https://github.com/DSpace/Rest7Contract/pull/87](https://github.com/DSpace/Rest7Contract/pull/87)

2. **REST API Projections**: [DS-3533](https://github.com/DSpace/Rest7Contract/issues/2) - Getting issue details... STATUS
   a. Work begun in [https://github.com/DSpace/DSpace/pull/2547](https://github.com/DSpace/DSpace/pull/2547) (by Chris Wilper)
      i. Based on detail discussions in our Oct 17 meeting.
   b. (Outdated) Early work begun at [https://github.com/DSpace/DSpace/pull/1847](https://github.com/DSpace/DSpace/pull/1847). Discussed in more detail in our Aug 22 meeting. Overall, this approach seems like a good direction, need volunteers to move it forward.
   c. [https://github.com/DSpace/Rest7Contract/issues/2](https://github.com/DSpace/Rest7Contract/issues/2) (discussion resumed by Andrea Bollini (4Science) could be relevant for the projection)

4. (REST Contract) Edit Homepage News: [https://github.com/DSpace/Rest7Contract/pull/45](https://github.com/DSpace/Rest7Contract/pull/45)
   a. Delayed. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
   b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
   c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.

5. ! (Angular Bug) [https://github.com/DSpace/dspace-angular/issues/368](https://github.com/DSpace/dspace-angular/issues/368) (Art Lowel (Atmire))

6. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
   a. We’ve decided (in meeting on March 7, 2019) to use ETags to implement concurrency. REST Contract notes on ETags: [https://github.com/DSpace/Rest7Contract/#tags--conditional-headers](https://github.com/DSpace/Rest7Contract/#tags--conditional-headers)
   b. ETags only update of the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
   c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.

Notes
