Agenda

- Roll call by timezone per following order - ensure notetaker is present (**moderator**)
 - folks outside North and South America
 - Eastern timezone
 - Central timezone
 - Mountain timezone
 - Pacific timezone
 - folks who were missed or who dialed in during roll call
 - *Welcome all newcomers!*
- Agenda (**moderator**)
 - Hyrax 2.1.0 update ([Tom Johnson](#))
 - 2.1.0.rc1 was released last week
 - Going through the pre-release QA process. Tickets to deal with new bugs are in progress.
 - There's still potential for more bugs to emerge.
 - RC2 may be released next week. Followed by final release late next week or the week after.
 - Tom encouraged people to test on their end.
 - ActiveFedora and Rails 5.2 ([Chris Colvard](#))
 - https://github.com/samvera/active_fedora/pull/1312
 - Rails 5.2 changed the ActiveRecord::Dirty API. This is causing problems with ActiveFedora.
 - Chris would like people to look over his PR. Other gems like hydra_works are also failing until AF is fixed.
 - Remove relic git tags from Hyrax (leftover from Sufia, right?) We are about to bump into tags for 3.x. ([Andrew Myers](#))
 - Old tags from the Sufia days have been deleted a couple of times, but they keep coming back.
 - People are likely accidentally pushing old tags up when they push a legitimate tag.

- We will soon need a 3.0 tag for Hyrax, but there's already a 3.0 tag from Sufia.
- An information campaign might be the best approach to resolve this.
- We should make sure the Hyrax release process describes how to push tags properly (only one specific tag).
- Idea: use the gemspec to get the current version and check for tags that are higher than that version.
- Call for new agenda items (**moderator**)
- Notetaker and moderator for next time
 - Notes: [Jim Coble](#)
 - Moderator: [Andrew Myers](#)
- After call, this week's notetaker should create the agenda for the next call.
