2020-03-19 DSpace 7 Working Group Meeting

- Date
- Agenda
- Attendees
- 7.0 Release Goals
- Current Work
  - Claim a Ticket!
  - PRs Needing Review
  - PRs Coming Soon
  - PRs Merged this week!
  - Blocked
  - Delayed / Needs Discussion
- Notes

Daylight Saving Time began on March 8 for parts of USA

Daylight Saving Time (DST) starts in parts of the USA on March 8, but starts in Europe on March 29. Because DST begins on different days in different parts of the world, this meeting time will change (temporarily) for anyone who experiences DST earlier.

The meeting will remain at 15:00-16:00 UTC through March, but this will now be one hour later for anywhere under DST.

As of April 2, once everyone is in DST, the meeting time will switch to 14:00-15:00 UTC (one hour earlier), in order to move it back into the normal timeslot for everyone.

Date
12 Mar 2020 from 15:00-16:00 UTC

Location: https://lyrasis.zoom.us/my/dspace (Meeting ID: 502 527 3040).

- More connection options available at DSpace Meeting Room

Beta 2 & 3 Sprint : March 16-27
- Concentrated work on Beta2 tasks, and beginning Beta3 tasks

Agenda
- (15 mins) Developer Stand Up - Developers give brief updates on their effort (or their team’s effort).
  - Update/see “Current Work” section below based on your status. Please feel free to update prior to meeting.
  - Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
- (25 mins) General Discussion Topics
  1. (Please add a topic)
- (20 mins) Planning for next week
  - Claim tasks for next week from DSpace 7 Release Plan spreadsheet
  - Assigning PRs for Review

Attendees
- Art Lowel (Atmire)
- Andrea Bollini (4Science)
- Tim Donohue
- Lieven Droogmans
- Mark H. Wood
- Giuseppe Digilio (4Science)
- Ben Bosman
- Chris Wilper
- Paulo Graça

7.0 Release Goals
These resources define the prioritization and general schedule we are working towards

- DSpace 7 Release Goals: overview of goals/timelines & beta release process
- DSpace 7 Release Plan spreadsheet: our planning spreadsheet which details which features are scheduled for each Beta release.
Current Work

Legend for status icons

★ = Highest Priority tasks (please prioritize these reviews/tasks over others).
× = review done, changes were requested or bugs found.
✓ = review done, approved.
⚠ = review done, merge conflict or other minor changes requests

1 APPROVAL = pull request only requires a single approval to merge. This is generally reserved for PRs which are either smaller, obvious, and/or have fixes with tests to prove they work.

Claim a Ticket!

If you do not have access in JIRA or GitHub to officially claim the ticket you wish to work on, contact Tim Donohue

- Available Angular UI Tickets
  - Open issues in 7.0beta2 milestone (highest priority)
  - Open issues in 7.0beta3 milestone (second highest priority)
  - Open issues flagged as "Difficulty: low". These may be a good starting point for newer developers.

- Available REST API Tickets
  - Unassigned tickets scheduled for 7.0beta2 (highest priority)
  - Unassigned tickets scheduled for 7.0beta3 (second highest priority)
  - General REST API tickets flagged as "low hanging fruit". These may be a good starting point for newer developers.
  - General REST API unassigned bug tickets. Again, might be a good starting point for newer developers.

PRs Needing Review

1. REST Contract) related to the scripts & processes PR above (related to PR 2648 below) https://github.com/DSpace/Rest7Contract/pull/99 (Andrea Bollini (4Science), REVIEWED, Tim Donohue)
2. (REST Contract) Login-as using WWW-Authenticate https://github.com/DSpace/Rest7Contract/pull/109 (Andrea Bollini (4Science), REREVEREW Tim Donohue)
3. (REST Contract) CC License https://github.com/DSpace/Rest7Contract/pull/110 (Andrea Bollini (4Science), REVIEWER Tim Donohue)
5. (NEW) (REST Contract) [Scripts & processes] Adding "nameLong" & "mandatory" attributes https://github.com/DSpace/Rest7Contract/pull/114 (NEEDS REVIEWER)
6. (REST) (beta4) Scripts & processes: importing and exporting csv's https://github.com/DSpace/DSpace/pull/2648 (WAITING ON PR UPDATES) (Andrea Bollini (4Science), REVIEWED, Tim Donohue - added summary of way forward Mark H. Wood)
7. (REST) Shibboleth authentication https://github.com/DSpace/DSpace/pull/2651 (Paulo Graça - REVIEWER, Ben Bosman - REREVIEW)
8. (REST) Initial implementation of the authorizations endpoints https://github.com/DSpace/DSpace/pull/2663 (Ben Bosman - minor comments/suggestions, Tim Donohue - RETEST)
9. (REST) Read only versioning endpoints https://github.com/DSpace/DSpace/pull/2680 (WAITING ON PR UPDATES) (Tim Donohue - REREVIEW, minor comments added)
10. (REST) DS-4122 Create Integration Tests to prove access restricted Communities/Collections cannot be accessed anonymously https://github.com/DSpace/DSpace/pull/2707 (Tim Donohue, OTHER REVIEWERS WELCOME)
11. (NEW) (REST) DS-4411 Create Integration Tests to prove newly created users have no special rights; https://github.com/DSpace/DSpace/pull/2712 (Tim Donohue, NEEDS SECOND REVIEWER)
12. (REST) (tentative 7.1) [DS-4281]: Metadata suggestions in the live import https://github.com/DSpace/DSpace/pull/2715 (Tim Donohue, Andrea Bollini (4Science))
13. (NEW) (REST) [Scripts & processes] Adding mandatory / longname options to rest output https://github.com/DSpace/DSpace/pull/2715 (Tim Donohue, Andrea Bollini (4Science) on contract PR)
15. (Angular) (beta2) Edit Item Bitstreams Tab https://github.com/DSpace/dspace-angular/pull/577 (Tim Donohue, Giuseppe Digilio (4Science))
17. (Angular) (beta2) Notice regarding the availability of new version on item pages; https://github.com/DSpace/dspace-angular/pull/595 (Tim Donohue, Reviewer)
18. (Angular) (beta3) Ensure workflow members can only perform actions assigned https://github.com/DSpace/dspace-angular/pull/607 (Giuseppe Digilio (4Science), Tim Donohue, Lowel Altimir)
20. (NEW) (Angular) (beta3) Switch to Angular CI https://github.com/DSpace/dspace-angular/pull/625 (Tim Donohue, Giuseppe Digilio (4Science))
21. (Backend) DS-626: Exchange usage data with IRUS https://github.com/DSpace/DSpace/pull/2664 (NEEDS REVIEWERS)
22. (Backend) (tentative 7.2) DS-4440 GDPR - Anonymize Statistics Feature: https://github.com/DSpace/DSpace/pull/2692 (Andrea Bollini (4Science), Ben Bosman, Tim Donohue)
PRs Coming Soon

PRs Merged this week!

1. (REST Contract) Remove subCommunities search method: https://github.com/DSpace/Rest7Contract/pull/111
2. (REST Contract) Edit profile - edit metadata https://github.com/DSpace/Rest7Contract/pull/113
3. (REST) DS-4278: Fix bug where submitters can edit all metadata: https://github.com/DSpace/DSpace/pull/2589
5. (REST) DS-4043 Revisit security layer of submission https://github.com/DSpace/DSpace/pull/2675
6. (Angular) Cache behavior for unknown type https://github.com/DSpace/dspace-angular/pull/611
7. (Angular) beta3 Administrative Search https://github.com/DSpace/dspace-angular/pull/615
8. (NEW) Angular (beta3) Manage Account Profile https://github.com/DSpace/dspace-angular/pull/618
10. (Backend) (beta3) Discovery index for private and withdrawn items https://github.com/DSpace/DSpace/pull/2706
11. (OAI-PMH bug) (DS-4462) Fix CREATEDATE format to use correct specifiers https://github.com/DSpace/DSpace/pull/2717

Blocked

1. (Blocked PRs go here)

Delayed / Needs Discussion

1. Managing Authorization info in Angular UI : How to pass Authorization rights (i.e. logged in user's access rights) from REST API to Angular? See for example: https://github.com/DSpace/dspace-angular/issues/393
   a. In July 25 meeting, we noted this probably cannot be resolved with just one simple solution. May need to look at different options for different scenarios
   b. Work is ongoing, but has been started in these areas:
      i. Summary of ideas: REST Authorization
      ii. Contract for Authorization Endpoints: https://github.com/DSpace/Rest7Contract/pull/92
2. Initial Performance Testing from Chris.
3. (REST Contract) Edit Homepage News: https://github.com/DSpace/Rest7Contract/pull/45
   a. Delayed. General agreement in meeting on March 21, 2019 that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata) that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
   b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
   c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
5. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
   a. We've decided (in meeting on March 7, 2019) to use ETags to implement concurrency. REST Contract notes on ETags: https://github.com/DSpace/Rest7Contract#etags--conditional-headers
   b. ETags only update of the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
   c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.

Notes
