Hydra Triple Store Interest Group

A hub to capture information related to the Hydra Triple Store Interest Group (HTSIG).

Our primary communication channel is the hydra-tech mailing list, for maximum transparency and inclusivity.

Scope

At Hydra Connect 2015, a group gathered to begin a discussion of having the Hydra stack work with a triple store for managing metadata instead of Fedora. This interest group will discuss this and general topics of working with triple stores and ActiveTriples for persistence of triples into a triple store.

The Hydra Triple Store Interest Group will bring together interested parties to discuss issues related to the working with triple stores primarily in the Hydra community. Topics may include:

- General discussion on working with triples stores
- Tools for working with triple stores
- Efficiency of various triple stores
- Projects working with triple stores
- Understanding and using ActiveTriples for persisting triples into a triple store
- Extending ActiveTriples to include an LDP persistence strategy compatible with Fedora
- Converting ActiveFedora to use ActiveTriples
- Using the Hydra Stack over a triple store for metadata persistence instead of Fedora

History

At Hydra Connect 2015, a group gathered to begin a discussion of having the Hydra stack work with a triple store for managing metadata instead of Fedora.

Members

- E. Lynette Rayle, chair (Cornell)
- Hector Correa (Penn State)
- Adam Wead (Penn State)
- Aaron Coburn (Amherst College)
- Mark Matienzo (DPLA)
- Tom Johnson (DPLA)
- Julie Allinson (University of York, UK)
- Matthew Critchlow (UC San Diego)
- Nabeela Jaffer (University of Michigan)
- Ryan Wick (Oregon State University)
