3. **Discussion / confirmation of the Work Group charters based on the following topics from the Hydra connect meeting (Chris Awre)**
   - Talk about Premis and the events we would want to see defined in Hydra
   - It’s connection with PCDM and to make sure that PCDM can take into account digital preservation needs
   - Finding the common actions and assessing at what layers those actions could be run. That would help decide where in the service those actions should rest.
   - For those that are considering Hydra it would be helpful to be able to articulate how Hydra can help with satisfying digital preservation needs
   - Performing a gap analysis and creating a list of functional requirements for preservation needs and perhaps identifying costs. The LIFE cost model could be used for this.
   - Share screen shots of systems in development
