Health Report

We should double-check the list of Gems which were promoted and deprecated

Anything that depends on Rails 6.0.0 requires a version of active-model which requires Ruby 2.5

As a result, updating active-fedora to support Rails 6.0.0 does not permit Ruby 2.4 to be used in the builds

Support for future releases:

With the Rails release of 6.1.0, we will only release versions 6.0.Z and 5.2.Z

Blacklight still does not support Rails 6.0.0
