      ii. Michael and Jessie: Fixing it in 4.0.0 sounds fine.
      iii. Justin: Do anyone want to fix it in older version?
      iv. Jessie: If institution wants to fix in that version, we can do another release of that version
      v. Justin will reply to person

   a. Justin: We should add the drop-down back in code
   b. Jessie: Can’t see a reason we shouldn’t add it back in
   c. Justin: Could put qf in default document solr params
   d. Consensus on first option

5. HYDRA-757
   a. Supporting mixin assertions in addition to model assertions
   b. Michael: This would be great
   c. Justin: Sounds good for version 5
   d. Matt: Here’s what people at LibDevConX said we should move towards:
   e. https://github.com/projecthydra/hydra-head/blob/master/app/models/mods_asset.rb
