Participants

- James R. Griffin III (Princeton University Library)
- Randall Floyd (Indiana University)
- Collin Brittle (Emory University)
- Bess Sadler (DCE)

Agenda

- GitHub Board Review Column
- Update on Virtual Connect 2020
  - TBD (but likely the last week in April)
  - James enquired about this, and those planning the event were interested in our input
- Update on Partners Meeting 2020
  - Scheduled for 04/27/20
- Component Maintenance Spring 2020 Sprint
  - Doodle Poll for the week of 04/06/20, 04/13/20, or some later week
- Identifying Components for Promotion
  - https://github.com/samvera-labs/samvera-nesting_indexer
  - https://github.com/samvera-labs/starter-react-component-npm
  - https://github.com/samvera-labs/openseadragon-react-viewer
  - https://github.com/samvera-labs/hydra-idap
  - https://github.com/samvera-labs/geomash
  - https://github.com/samvera-labs/ldpath
  - https://github.com/samvera-labs/bixby
  - https://github.com/samvera-labs/geoserver-publish
  - https://github.com/samvera-labs/samvera-circleci-orb
  - https://github.com/samvera-labs/hydra-remote_identifier
  - https://github.com/samvera-labs/active_fedora-datastreams
  - https://github.com/samvera-labs/speedy_af
  - What has been updated since January 2019?
  - What is currently in use?

Notes

- James will offer a Doodle Poll for the proposed weeks and share this by e-mail
- DCE might have capacity to contribute to the sprint
  - Getting up to speed on Samvera work, pairing might be helpful
  - James will review sprint structuring and see about identifying some issues for pairing
  - This should include reviewing documentation and releasing Gems
- James would like to see about setting some criteria regarding promotion of Gems
  - Who is using the project?
  - Have they been updated since January 2019?
  - This should be structured as issues for the GitHub Project Board
  - James will offer a Google Sheet for the next call regarding project promotion
- Selecting samvera-labs Projects
  - There are indeed projects which are very specific to solution bundles
  - Should these be included? Maybe lower priorities for promotion if not excluded outright?
  - DockerHub?
- James will assign reviews to WIP pull requests
- Meeting adjourned at 15:29 EST
