Browse Results

Repository Facets

The repository facet currently has collections mixed in with the repositories. Only the following repositories should be present:

- Manuscripts and Archives Yale University Library - currently this is just named Manuscripts and Archives. MM: See my comments on collection home review page
- Stanford University. Department of Special Collections and University Archives (4)
- Hull University Archives (2)
- University of Virginia Library. Albert and Shirley Small Special Collections Library (1) - this shows up twice should be 2 collections associated with this repository not (1). Collections are Cheuse and Warner.
- Yale University Beinecke Rare Book and Manuscript Library (1) MM: See my comments on collection home review page

Display Name Facet (Collection Title)

The following items in this facet are not collections and need to be stripped out prior to the demo:

- fake collection
- Collection
- All intermediate sets 1,2,3
  - Another change should be that the number beside the collection should be removed. These are single collections and the number will only ever be 1 so it is non-sensical to have it listed

Local ID (Call Number)

Call numbers are specific to collections only so the following needs to be stripped from this facet list:

- coll (1)
- intermed2 (1)
- intermed3 (1)
- item 1 (1)
- item 2 (1)
- local id (1)

Object Type facet

Please make these plural rather than singular. eg. Collection = Collections MO: Done on test
