DSpace Release 3.1 Notes
Version 3.1

Summary
DSpace 3.1 is a bug fix release to resolve any issues located within DSpace 3.0. As it only provides bug-fixes, DSpace 3.1 should constitute an easy upgrade from DSpace 3.0 for most users. No database changes or additional configuration changes should be necessary when upgrading from DSpace 3.0 to 3.1.

This small bug fix release addresses a number of issues that have cropped up since 3.0. These issues include:

- Resolved Oracle Database compatibility issues in 3.0
- Several bug fixes to the new OAI interface (introduced in 3.0)
- Fixed the Discovery "More like this" feature (introduced in 3.0)
- "Porting" of type-based submission feature (introduced in 3.0) to JSPUI
- Other minor fixes / improvements (a detailed list of all changes can be found below)

For upgrade instructions for 3.0 to 3.1, please see Upgrading From 3.0 to 3.x.

No new features in DSpace 3.1

3.1 is a bug-fix only release. This means it includes no new features and only includes fixes for bugs which were found in the 3.0 release. It also contains some minor improvements to features introduced in DSpace 3.0.

For a list of all new 3.0 Features, please visit the DSpace Release 3.0 Notes.

Changes
The following fixes were released in 3.1.
Organizational Details

**Release Coordination**

- Release Coordinator: Committers Team (shared coordination)
