

Use Case 1.1 - UI Mockup - View Virtual Collection Metadata dialog

[Planning](#) | [Description](#) | [Requirements](#) | **UI Mockup**

The screenshot displays the Cornell University Library interface. At the top, the library logo and name are visible, along with navigation links for 'My Virtual Collections', 'My Account', and 'Help'. Below this is a secondary navigation bar with links for 'Home', 'About Us', 'Libraries and Hours', 'Courses', 'Research', 'Services', and 'Ask a Librarian'. The main content area is titled 'Archery Technique' and shows a list of items. A modal dialog box is open, displaying the metadata for the selected item. The dialog has a title 'Archery Technique' and a close button (X). It contains the following text:

Description: I have collected together resources that I have found useful in developing my archery technique. I hope you find them helpful as well.

Access: Public

At the bottom of the dialog are 'Done' and 'Edit' buttons. A yellow callout box with a red arrow points to the 'Done' button, containing the text: 'Click Done to return to My Virtual Collections page.' The background shows a list of items with details such as author, title, and availability status (e.g., 'Online').
