

2018-04-12 SIGAHR Meeting notes

Date

12 Apr 2018

Attendees

- [Ryan Steans](#)

Goals

Discussion items

Time	Item	Who	Notes
	Giarlo to Tom transition	?	
	Partners Meeting impact	Steve, Giarlo, Tom	Roadmap Council, etc...
	Current work	Steve	<ul style="list-style-type: none">• Hyrax Issues Task Force: currently addressing, prioritizing and labelling outstanding issues on Hyrax
	Dedication of Resources	Carolyn Caizzi	Carolyn establishing Hyrax WG <ul style="list-style-type: none">• IU - 1/2 - full FTE Dev• Tom J for Tech lead• NU - 1 Full FTE (maybe Chris Diaz on QA)• Discussing with Notre Dame and UCSD
	Working Groups - Batch Edit	Tom Johnson	Planning Bi-weekly meetings Hyrax Batch Import-Export WG A likely early deliverable will be a review of things like WGBH - https://github.com/IUlibTech/hyrax-ingest
	Nurax to Hyrax		Concern over issues in Nurax specific to Nurax versus those that need to be elevated to Hyrax Tickets/ are Hyrax issues SVT: Post release clean-up process that pulls non-blocking bugs from nurax and places tickets in hyrax repo with labels, etc... (Julie Rudder said she might be able to help)
	Metadata IG		Julie Hardesty - reported that the Metadata IG will have metadata issues for Hyrax coming in near future Hyrax Metadata Ordering Working Group - evaluating options and starting a write-up. No rec's yet, but will decide on recs after next meeting (week of 04/ 16)
	OAI-PMH	Julie Rudder	Adding OAI-PMH to the short-term roadmap
	Operational	Tom Johnson	made some changes to the way the 2.1.0 release tickets are organized, to avoid overloading between the "milestone" and the release "project". My recommendation (based heavily on what seems to be actual current practice) is to use the "project" feature for specific releases. I'd like to put a formal "release manager" in charge of those projects when they open up in the future (thanks Lynette Rayle for being the de facto release manager on 2.1.0). Additionally, I'm hopeful that we can structure the milestones so that every ticket can be sorted into one of them. 2.1.0 tickets belong in the 2.x Series milestone. This way if tickets get dropped from the *project* they are still sorted into the release series and can be treated as upcoming work by default.
