

# Hyrax v3.0 MAP Documentation Review Working Group Meeting 2020-09-30

## Connection Info:

9-10am EST

via Google Hangouts: [meet.google.com/fmf-zzpm-mfp](https://meet.google.com/fmf-zzpm-mfp)

**Notetaker:** Nora E.

## Attendees:

Juliet Hardesty

Annamarie Klose

Emily Ping O'Brien

Nora Egloff

## Agenda/Notes:

- Group review of draft Hyrax 3.0 M3 spec: <https://github.com/samvera-labs/houndstooth/blob/master/examples/hyrax.yml>
  - \*property definitions now match those in the spreadsheet MAP
  - \*added more usage guidelines
  - \*ordering: neutral M3 spec has basic metadata before core; AK shifted ordering within these categories to match it to MAP sheet.  
(JH: This is a convention other bits of Samvera metadata documentation and should be maintained)
  - \*alternative\_title
    - index\_documentation: "Alternative Title should be indexed as searchable and displayable."
    - confirmed that alternative\_title is not indexed or searchable in Nurax running 3.0.0.pre.rc2
  - \*keyword
    - confirmed that it is facetable and searchable in Nurax running 3.0.0.pre.rc2, as it appears in the spec
    - but, keyword probably should not be facetable
  - \*description
    - there are 2 different definitions for this property for GenericWork and for Collection
    - same label, but different help text depended on Work type
  - \*based\_near/location
    - usage\_guidelines should indicate that the QuestioningAuthority gem is required in order for GeoNames webservice to work as a controlled vocab source. QA does come out-of-the-box with Hyrax but requires some config for it to make GeoNames work.
    - \*should this Hyrax 3 M3 spec version go on the houndstooth github?
    - yes, once it is finalized.
- Group review of sheet MAP errors: <https://docs.google.com/spreadsheets/d/1yZZvoQG6lANyqinMlxuOWT4W4ZllyBJVrSii5IaxEm4/>
  - \*EP confirmed in Nurax that even though it probably shouldn't be, license is in fact (0,n)
  - \*could bring this up to folks at SMIG and if there is consensus, make an issue
- Group review of Knowledge Base commit, then do pull request (Julie H. )
  - TODO: italicize entire table row; add text on model.md that MAP has current list of metadata fields for latest version of Hyrax; update .rb links to go to master branch
  - [From 2020-08-13 meeting](#): clarifying Generic Work from Collection models and pointing to M3
- SMIG / broader community feedback on the MAP and/or M3 spec
  - \*will share to email lists and on Slack to solicit feedback, and will also ask for feedback during Connect presentation
- Connect Lightning Talk has been moved to WG updates slot
- Next steps:
  - \*at next meeting, prioritize group review of Knowledge Base commit draft language since we didn't get to it this time
  - \*finalize review of Hyrax 3 version M3 spec (AK has shared draft .yml to WG Slack for folks to download & view in text editor)
- Set next meeting time:
  - \*next meeting will be **Wednesday, 10/7 at 9am EST**
