2017-08-03 Ontology Birds of a Feather Meeting

Date

03 Aug 2017

Attendees

- Christian Hauschke
- Dong Joon (DJ) Lee
- Muhammad Javed
- Juliane Schneider
- Marijane White
- Brian Lowe
- Mike Conlon
- Damaris Murry

Deliverables

1. A description of the scope of VIVO and its ontologies in content & quality. In order to ensure that the scope is well-defined, it might help to collect local ontology extensions from individual implementations and see if there is a common need that VIVO doesn't address. Completed. See https://goo.gl/vRkQl4
2. Develop a process for reporting ontology needs. Currently there are several places this might be done. We should have a place that is sufficient for the work and can be shared broadly. In progress. See https://goo.gl/jnvjCT
3. Make two ontology changes (one relatively easy, and one that would require a change in the software) and then deliver a technical plan and a communication plan to support these changes. To do.

Agenda

1. Plans for meeting at the conference
2. Update on action items. See below.
3. Creating a base ontology file. See https://goo.gl/Wztgon
4. Dave Eichmann's data on ontology usage across sites. See vivo_ csv files in the task force Google Drive folder here: https://goo.gl/TLjNdj

Notes

Notes will be available here: https://github.com/openrif/vivo-isf-ontology/wiki

Action items

1. Create a viable VIVO-ISF master containing VIVO ontologies (in progress)

    1. See summary of ontology sources here: https://goo.gl/Wztgon
2. Create a group of committers and reviewers (in progress)
3. Create a folder of exported VIVO ontology files. Mike Conlon Done. See https://goo.gl/kUjT1Q
4. Triage and move issues from community repository to the master repository. Done

    1. Issues moved from community to vivo-isf-ontology. Tagged VIVO as appropriate.
    2. Additional issues opened in community
    3. Issues from VIVO JIRA added to community of vivo-isf-ontology as appropriate
    4. VIVO JIRA ontology issues opened to stay in synch (2 pending close were not added)
    e. 18 issues in community, 37 vivo issues in vivo-isf, 45 ontology issues in VIVO JIRA
5. Javed to present his ontology for tracking ontology changes at a future meeting
6. Explore track changes in Web protege
7. Explore Robot tool (actively supported) for VIVO extraction -- clone their repo and run their tests (in progress)
8. Define roles and responsibilities of participants -- analyst, editor, committer, tester.
9. Create workflows and documentation ("instruction manuals") for each of those roles
