

# Integrations - Linking to repository content through a learning management system

<b>Title (Goal)</b>	People using learning management systems should be able to link to repository content
<b>Primary Actor</b>	External System
<b>Scope</b>	overall system
<b>Level</b>	high level summary
<b>Story (A paragraph or two describing what happens)</b>	Professor Steve want to show some research stored in the repository to his students. He can easily link the research he wants in his learning management system. By doing so, his students can be shown additional repository content next to the content which was already available within the learning environment.
