DSpace Working Groups

Working Group Objectives

DSpace Working Groups are teams which are created to achieve a specific set of deliverables. They are created / established with a specific action in mind, often by either the Steering Group or an Interest Group. Working Groups tend to have the following properties:

- They have a definitive start and end date
- They have a definitive set of deliverables or expected output
- They often report back to whatever Project Team established the Working Group (usually either the Steering Group or an Interest Group)

Existing Working Groups

- [DSpace 7 Entities Working Group](#) — The DSpace 7 Entities Working Group has merged with the DSpace 7 Working Group, to work together on the final 7.0 release.
