Notes

Resource review

Added resources:
- Notify Project
- Figshare live roadmap
- TIND (roadmap coming soon)

Missed alternative product roadmaps
- Fedora
- Samvera

List is considered complete.

Engaging stakeholders

Goal: Positioning Paper: Where should DSpace go to stay relevant. Selected use cases from DSpace Positioning should be used for structuring.

Stakeholders to be engaged: 1. Certified DSpace Partners 2. National User Groups

Step 1: Engage certified DSpace partners:
- Timeline: End of May
- Separate online interview (1-1.5 h) with each partner and subgroups of the working group. Roadmap for the interview to be sent ahead.
  - Focus on:
    - Three areas you find crucial
    - What does DSpace need to be to stay/become a thriving open source ecosystem to service providers?
    - What is needed to position DSpace for the future for broad use areas (see DSpace Positioning)
    - Focus on clients: What kind resp. which of your client concerns are not matched in current DSpace?
- Possible additional input:
  - Additional feature catalog offered by service provider

Next Steps

- Draft interview outline. Kimberly Chapman will start a document.
- Decide on subgroups for interviews
