2019-07-11 DSpace 7 Working Group Meeting

• Date
• Agenda
• Attendees
  • Tickets / PRs In Progress
  • PRs Needing Review
  • PRs Merged this week!
  • Blocked
  • Delayed / Needs Discussion
• Notes

Date
11 Jul 2019 from 14:00-15:00 UTC

Location: https://duraspace.zoom.us/my/dspace (Meeting ID: 502 527 3040).
  • More connection options available at DSpace Meeting Room

Agenda

• (15 mins) Developer Stand Up - Developers give brief updates on their effort (or their team's effort).
  • Update/see "Current Work" section below based on your status. Please feel free to update prior to meeting.
  • Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
• (30 mins) General Discussion Topics
  1. (Topic #1) Short mention from Andrea Bollini (4Science) about the strategy to adopt to manage relations (entities) in the submission. The expectation is to enhance/update the workspaceitem endpoint as required but to don't use directly the item endpoint (i.e. /api/core/items/:uuid/relations). As soon a design document/PR/idea is ready Andrea Bollini (4Science) will be happy to provide feedback, please just ping Andrea Bollini (4Science).
  2. (Topic #2) (Used time for a deeper discussion of outstanding PR)
  3. Improved Estimation Strategy for Beta release. (Estimates should include time for discussion / code reviews, also should be done by multiple developers)
    a. Development Planning Spreadsheet needs to be updated, so that we can determine what (outstanding) tasks need estimation.
    b. Will be using Wideband Delphi estimation technique
• (15 mins) Planning for next week
  • Assigning PRs for Review
  • Next tasks from Development Planning Spreadsheet

Attendees

• Art Lowel (Atmire)
• Andrea Bollini (4Science)
• Tim Donohue
• Heather Greer Klein
• Lieven Droogmans
• Mark H. Wood
• Giuseppe Digilio (4Science)
• Ben Bosman
• Pascal-Nicolas Becker
• Chris Wiper
• Terrence W Brady
• Pablo Prieto
• Paulo Graça
• Bill Tantzen

Current Work
**Tickets / PRs In Progress**

1. (Angular) Adding Accessibility via Travis CI: https://github.com/DSpace/dspace-angular/pull/356 (work in progress) (Lower priority)
2. (REST) Group and eperson management: https://github.com/DSpace/DSpace/pull/2282 (Waiting on updates from Ben Bosman)
3. (REST) Revisit the security layer of the submission: https://github.com/DSpace/DSpace/pull/2459 (Waiting for confirmation of proposed approach by Andrea Bollini (4Science) from Kevin Van de Velde (Atmire) and any other interested/available)
4. (Backend) DS-4257: Renaming "dspace-spring-rest" to "dspace-server" (Tim Donohue). (Timeline: Not likely to be completed until after OR2019)
5. (NEW) Shibboleth Login: https://github.com/DSpace/DSpace-angular/pull/417 (there are Travis CI errors)
6. (angular) Transfer to .po message format - Initial PR: https://github.com/DSpace/dspace-angular/pull/366 (Paulo Graça, Art Lowel (Atmire))

**PRs Needing Review**

1. (REST Contract) Collecting statistics: https://github.com/DSpace/DSpace/pull/63 (Dimitris Pierrakos, Andrea Bollini (4Science) - needs a change, Ben Bosman)
2. (Backand) Upgrading to Handle Server v9: https://github.com/DSpace/DSpace/pull/2282 (Tim Donohue, Ben Bosman - resolve merge conflicts)
3. (REST) (Entities) DS-4223 Metadata Schemas for configurable entities: https://github.com/DSpace/dspace-angular/pull/2443 (Paulo Graça, Mark H. Wood)
4. (Higher priority) (REST) [DS-4266] bitstream format registry: https://github.com/DSpace/dspace-angular/pull/2442 (Ben Bosman, Andrea Bollini (4Science) changed)
5. (Angular)Configurable browse-by: https://github.com/DSpace/dspace-angular/pull/421 (closes #361) (Tim Donohue, Paulo Graça, Giuseppe Digilio (4Science) approved)
6. (Angular) Move Item Component: https://github.com/DSpace/dspace-angular/pull/335 (Giuseppe Digilio (4Science), NEEDS SECOND REVIEWER)
7. (Angular) Item-Collection Mapper: https://github.com/DSpace/dspace-angular/pull/348 (NEEDS REVIEWERS)
8. (Angular) Shibboleth integration support: https://github.com/DSpace/dspace-angular/pull/419 (Paulo Graça, Tim Donohue, Laura Henze)
9. (Angular) DS-4223 Metadata Schemas for configurable entities: https://github.com/DSpace/dspace-angular/pull/420 (Paulo Graça, Tim Donohue)
10. (Angular) Configurable browse-by: https://github.com/DSpace/dspace-angular/pull/421 (closes #361) (Tim Donohue, Paulo Graça, Giuseppe Digilio (4Science) approved)
11. (Angular) Move Item Component: https://github.com/DSpace/dspace-angular/pull/335 (Giuseppe Digilio (4Science), NEEDS SECOND REVIEWER)
12. (Angular) Item-Collection Mapper: https://github.com/DSpace/dspace-angular/pull/348 (NEEDS REVIEWERS)
14. (Angular) Shibboleth integration support (WORK IN PROGRESS): https://github.com/DSpace/dspace-angular/pull/429 (Julius is looking for feedback/help) (Giuseppe Digilio (4Science) needs a rebase of branch, Fernando FCT/FCCN - does this PR really have more than 1600 files changed?)
15. (Backend) Upgrading to Handle Server v9: https://github.com/DSpace/dspace-angular/pull/2394 (Mark H. Wood, Ben Bosman)
17. (Merge on/around July 19th) (Backend) One Webapp Phase 2: Rename "dspace-spring-rest" to "dspace-server-webapp": https://github.com/DSpace/dspace-angular/pull/2329 (Mark H. Wood, Alexander Sulfran, Terrence W Brady)

**PRs Merged this week!**

1. (REST Contract) upload bitstream to archived item - https://github.com/DSpace/DSpace/pull/251
2. (REST Contract) Document need to escape special characters - https://github.com/DSpace/DSpace/pull/58
3. (REST) Some minor code cleanup in the tests: https://github.com/DSpace/DSpace/pull/2448
4. (REST) (Entities) Relationship search by label: https://github.com/DSpace/DSpace/pull/2450
5. (REST) (Entities) DS-4244 Add configurable entities unit tests: https://github.com/DSpace/DSpace/pull/2446
6. (REST) DS-4210 Deposit on collection without workflow seems to fail (405 but succeed): https://github.com/DSpace/DSpace/pull/2429
7. (REST) (Entities) DS-4244 Add configurable entities unit tests: https://github.com/DSpace/DSpace/pull/2446
8. (Angular) Shibboleth integration support: https://github.com/DSpace/DSpace/pull/2450
9. (Angular) Configurable browse-by: https://github.com/DSpace/dspace-angular/pull/421 (closes #361) (Tim Donohue, Paulo Graça, Giuseppe Digilio (4Science) approved)
Blocked

- (Blocked PRs go here)

Delayed / Needs Discussion

1. Initial Performance Testing from Chris. **Needs detailed discussion in a future meeting**
   - [https://cwilper.github.io/dspace-perftest/](https://cwilper.github.io/dspace-perftest/)
2. (REST Contract) Edit Homepage News: [https://github.com/DSpace/Rest7Contract/pull/45](https://github.com/DSpace/Rest7Contract/pull/45)
   a. Delayed until after Preview release. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and *is stored in metadata* that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
   b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future.
   c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
3. (REST) Scripts & Processes endpoint: [https://github.com/DSpace/Rest7Contract/pull/17](https://github.com/DSpace/Rest7Contract/pull/17)
4. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
   a. We've decided ([in meeting on March 7, 2019](https://github.com/DSpace/Rest7Contract#etags--conditional-headers)) to use ETags to implement concurrency. REST Contract notes on ETags: [https://github.com/DSpace/Rest7Contract#etags--conditional-headers](https://github.com/DSpace/Rest7Contract#etags--conditional-headers)
   b. ETags only update if the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
   c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.
5. Not discussed much, but could there be opportunities to use Travis CI + Docker Compose for testing of Angular??
   - Docs: [https://docs.travis-ci.com/user/docker/#using-docker-compose](https://docs.travis-ci.com/user/docker/#using-docker-compose)
   - An example travis.yml file: [https://github.com/Ortus-Solutions/docker-buildfiles/blob/master/.travis.example.yml](https://github.com/Ortus-Solutions/docker-buildfiles/blob/master/.travis.example.yml)

Notes

- Most of meeting involved a detailed walkthrough/assignment of outstanding PRs (in order to move them forward ASAP). Notes are inline above.
