

How to Install Oracle Java 8 JDK

Install Java 8 jdk (Oracle) via "apt"

Open a command line interface and enter the following (Ubuntu):

Installation instructions for Java SE 7 on Ubuntu

```
$ sudo add-apt-repository ppa:webupd8team/java
$ sudo apt-get update
$ sudo apt-get install oracle-java8-installer
$ sudo apt-get install oracle-java8-set-default
```

For other *nix variants you may have to add other repos or manually download and install Java.

*Do not use OpenJDK because some component you might need down to road e.g. [Djatoka](#) will only work with Oracle Java
