Minutes

1. Sprint Planning update: We are all heartened to see that [Jon Roby](#) will be joining Sprint 2 (among many others).
2. [Aaron Birkland](#) announced that he'll be able to focus more effort on Fedora now that he has launched his JHU Fedora4/Ember project.
3. As a team we made significant progress this week on
 - a. CTS Suite (many fixed tests, many new tests, versioning and external content are completely stubbed out)
 - b. [Jared Whiklo](#) and [Ben Pennell](#) doing some nice work on tag teaming tickets
 - c. [Kevin Ford](#) continues to move the docs forward
4. In progress tickets
 - a.

5. Remind everyone that test Suite issues are tracked in Git Hub Issues, not JIRA. Look there for grabbing broken or stubbed tests.
6. General consensus on the notion that if you are willing and able to work issues on the fcrepo4 core codebase, better to put your effort there at this point. However if you are just itching to dip into the CTS, feel free.
7. [Danny Bernstein](#) will prefix API alignment issues with corresponding spec section numbers.

Actions

- Danny to explore inserting a macro into documentation for Fedora version.
- Send email to community seeing who is interested in reviving OAI
