

2019-01-18 Cornell LD4P2 Meeting notes

Date: 18 Jan 2019

Attendees: Tim, Simeon, Lynette, Steven, Huda (remote)

Regrets: Jason

Agenda & Notes

Review actions from 2019-01-11 Cornell LD4P2 Meeting notes

- **Steven Folsom** LC Names is in QA without going thru context workflow. **Steven Folsom** will work with **Huda Khan** to set up.
 - 2018-12-13 - Awaiting data dump. LC working on it but they have yet to achieve. Larger data set so it's taking time. No deadline provided.
 - 2019-01-11 - Dave had added LCNAF to D.A.V.E. and Steven is working on the context needed for the search lookup UI.
 - 2019-01-18 - Some discussion of language tags. ACTIONS on Lynette/QA - 1) investigate & document algorithm for selection of languages with label and/or no label, 2) fix known bug in returning label in case with no language match (need to check whether it still exists after refactor). ACTION to suggest that we should discourage much data munging in D.A.V.E. for now, wait until we have more of environment available as basis to test and make decisions about specific places where munging for specific data sources might be needed.
- **Jason Kovari** going thru CUL's D&A Jira (next week or so): <https://culibrary.atlassian.net/secure/RapidBoard.jspa?rapidView=19&projectKey=DISCOVERYACCESS&view=planning.nodetail>
 - 2019-01-18 - Jason now has access to the D&A Jira
- **Huda Khan** is working on whether usability work on catalogs has been done internally as well as externally to CUL. Code4Lib journal and another has some details
 - Have been looking at usability work and literature. Found some older material on Blacklight tests (when facets new), not so much after that. Some log analysis on SearchWorks. Also looking at linked data browser tools. Interesting dissertation from a few years ago on LD exploratory search. See [discovery folder](#), literature exploration [NOTES DOCUMENT](#), [initial discussions](#) with Tim regarding knowledge panels etc. , and also Stanford [NOTES FROM LAST SUMMER](#)
- **Jason Kovari** will coordinate with Astrid on scheduling a meeting for those involved in the Discovery work plan.
 - Jason, Tim, Astrid and Huda had meeting yesterday. Astrid has spoken with a few people. Huda will set up another meeting to plan way forward
- **E. Lynette Rayle** to follow up with YAML for https://github.com/LD4P/qa_server/issues/13 and https://github.com/LD4P/qa_server/issues/26, then Steven will shepherd the process with the person requesting. Also with Christine and Marc around Wikidata
 - **E. Lynette Rayle** : one open PR for demographics. will run tests to see if pass or fail
 - 2019-01-18 have checklists on #13, #26, #42 which sets out process – this action DONE to follow rest of process
 - **Steven Folsom** will ping cohort to find "owner" for LCMPT and source of accuracy tests https://github.com/LD4P/qa_server/issues/13
 - Pending Nancy Lorimer response
 - **E. Lynette Rayle** will put LCDGT into production and note test results in https://github.com/LD4P/qa_server/issues/26
 - DONE, in production
 - **E. Lynette Rayle** will work with Dave on Video Game Genre Forms request https://github.com/LD4P/qa_server/issues/42 – pending work from Dave
 - Still in Dave's camp
- **Steven Folsom** will follow up with Christine and Marc about what entities we want to support lookup from wikidata
 - <https://docs.google.com/spreadsheets/d/1rPvEoP9iYNkxJ0eWC8gXe3ci7e6mhW0da59xkGhadi0/edit#gid=965082913>
 - Steven will add comments to https://github.com/LD4P/qa_server/issues/15 to make specific connection to the spreadsheet describing entity searches requested for Wikidata
- **Huda Khan** has created local fork of Sinopia editor and see what it takes to get front-end to do things to get them in-line with what we want to see... without affecting Stanford's development work
 - Have started looking at code and looking at use of React. Expect to work on this at beginning February
 - Steven would like to try uploading a profile
- **E. Lynette Rayle** to ping Dave about possible QA/DAVE presentation at LD4 Conference
 - Going to do this with Dave, working on it this pm
- **Huda Khan** to discuss with Astrid possibility of UX presentation
 - Have discussed with Astrid. Abstract "yes" so far
- **Jason Kovari** will discuss in LTS whether there are URIs from Share-VDE data that are useful and might be added to catalog
 - 2019-01-18 Unknown status
- ACTION NEXT Week - discuss Cornell goals at LD4 meeting and who might go
- Issues: <https://waffle.io/LD4P/ld4p2-cornell>

Status updates and planning

- Based on the tech call this past week we can anticipate questions about the input/output of Casalini conversions. How do we want to staff this? What are Cornell's goals with the Casalini data?
 - For Sinopia - for copy cataloging work we need this data in DAVE/QA and in Sinopia. We understand data cleanup issues with current Share-VDE data
 - For Enhanced Discovery - need to scope work
 - Other local use - are there URIs that are useful and might be added to catalog? Need to first assess this. ACTION - Jason will discuss in LTS
- Discovery developer search – options?
 - Mention knowledge graph / other cool terms in job ad
- Authority Lookups for Sinopia (Production QA instance: https://github.com/ld4p/qa_server/issues/)

- ACTION [Steven Folsom](#) to follow up with Dave via an issue about support for the two entity searches for LCGFT as outlined in the spreadsheet <https://docs.google.com/spreadsheets/d/1rPvEoP9iYNkxJ0eWC8gXe3ci7e6mhW0da59xkGhadi0/edit#gid=696491968> – it seems that the current sub-authority support was a guess based on parallels with LCNAF from before the work to derive specific requirements and document in the spreadsheet
 - Probably need to do review for other authorities too
 - Lynette continues to focus on https://github.com/LD4P/qa_server/issues/27 - going well and could (if tailwind) complete next week else will be 3 weeks because of other commitments
- Prep for Cataloging Sinatra and other 45's (Discogs data, https://github.com/LD4P/qa_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs)
- Enhanced Discovery
 - Steven notes that there is now a W3C BF to schema working group, may help in providing an agreed upon set of mappings
 - See notes regarding usability work above. Astrid is conducting user interviews with researchers to understand discovery needs and has completed three of these so far.
 - Preliminary impressions: 2 areas: (a) Shorter-term Blacklight contributions: knowledge panel design and integration while bringing in linked data, schema output, and design and implementation of connecting to/integrating authorities (but linked data versions?), (b) design and exploration around how linked data could be integrated into discovery such as semantic search (which may involve interesting alignments between info modeled in ontologies and traditional library search and may even intersect with machine learning/NLP options), possibly resulting in prototypes that address particular user concerns (e.g. identifying related items, demonstrating more clearly what information is actually present and related within the search space, etc.). Based on literature/existing work, appears there are definite improvements to the search experience that are possible and preferred. Also very related to user experience: relevance and search algorithms.
- Travel and meetings
 - [LD4P2 Cornell Meeting Attendances](#)
 - LD4 conference
 - ANYONE who wants to speak must submit a presentation and there are no guarantees that partner submissions will be accepted
 - Possible discussions around wikidata
 - LD4P June 2019 Meeting: Agenda formation: <https://wiki.duraspace.org/x/p4B7Bg>
- Next meetings:
 - Lynette will be out for 1 Feb meeting (Samvera Valkyrie meeting)
