Notes

Draft notes in Google-Doc

- 2019 sprint series
 - Planning first sprint for March: focus on architectural fly-in topics
 - Outstanding items from last sprint? Need to merge development branch
 - decoupling search: need to resolve smoke tests
 - Solr working; Elastic still needs to be implemented
 - Integrating search engines and "shapes" as defined by Product Evolution group
 - Shapes and JSON schema
 - Not yet fleshed out; needs a second pass: integrating with ontology, etc.
 - Product Data definition:
 - <https://docs.google.com/spreadsheets/d/14EJH8qNloHpw7g3r7MzMzHilBekhXaF385sCZZd8OvXac/edit#gid=471799009>
 - Start to json-schema (needs more work)
 - https://github.com/vivo-community/product-evolution-sandbox/tree/master/experiments/duke/elastic_import/schemas
 - Can search engine indexing and core VIVO shapes be bridged? Probably not ready yet, but Jim Blake can have a draft ready prior to sprint
 - Using the DocumentModifier class
 - Might be better to focus on modularization of VIVO components for now
 - Necessary steps: what are the queries that need to be run? How to maintain multiple indices?
 - Don Elsborg may be able to reuse CU's python VIVO export to Elastic document scripts for Elasticsearch
 - Triple-pattern fragments: lingering issues
 - All data in triple store is publicly exposed
 - TPF server is currently configurable: maybe needs more documentation
 - Should data store be closed down by default? That would align with all best practices re: security, db administration
 - March sprint goals: Solr and Elastic; modularization; Docker
- Upcoming releases: first, a maintenance release (maybe end of March); then, modularization
- Dockerization: tested locally, needs more work
- Product Evolution meeting
 - JSON specification, GraphQL
 - Adding shapes (resources): how to customize
- Mailing list messages: cleaning the slate
 - Can Google Groups messages be forwarded to Slack?
 - Need to update jQuery plugins: Ralph will examine
 - Failed inferencing: mysteriously disappeared, problem solved
 - Don will handle facetview
 - Messages to be removed
- Closing out softball items under 5a
 - 1674: update of image processing libraries
 - Breaks on 1.9: may require too much work to get backported
 - merged with Graham's updates?
 - Original library is no longer supported; doesn't work with Open-JDK
 - Ralph: should be done by next week
 - 1672: error catching; Benjamin on it
 - 1667: back to Graham
 - 1659: documentation update; over to Mike
 - 1525: Huda will take a look

Previous Actions

- Brian Lowe confirm LDF server issue with TDB content stores
- Don Elsborg - add jira tickets for abox/tbox use cases - one ticket for each use case
- Brian Lowe - check with ontology group on handles
- Alex Viggio will bring news of Elasticsearch instead of Solr up with Product Evolution.
