

Date

12 Mar 2019

Time: 11:00 am, Eastern Time (New York, GMT-05:00)

To join the online meeting:

- ## Slack

- ## Attendees

blocked URL Indicating note-taker

1. Don Elsborg
2. Ralph O'Flinn
3. Huda Khan
4. Andrew Woods
5. Mike Conlon ★
6. Jim Blake
7. Steven McCauley
8. Alex Viggio

Agenda

1. [Selenium Tests VIVO Acceptance Tests](#) - [Jim Blake](#)
2. [When Androids Dream](#) (codename: androdis) - [Huda Khan](#)
3. [March \(18-29\) sprint planning](#)
 - a. Finish work on externalizing Solr and Elasticsearch
 - b. Decoupling - Dockerize: Solr, Elasticsearch, MySQL, rest-of-VIVO
 - i. Reference: Docker [101](#) and [102](#)
 - c. [2019-03-18 Sprint Kickoff Meeting](#)
4. [Mailing list messages](#)
 - a. [Some triples not getting deleted in VIVO?](#)
 - b. [How can I backup the custom Pages that have been created?](#)
 - c. [ORCID login on vivoweb.org return with error](#)
 - d. [ORCID Integration - Sync](#) - [Muhammad Javed](#) suggesting [Jim Blake](#) has clues
 - e. [Issues with VIVO 1.9.3 and activating the ORCID integration](#) - (do we have contact with Metcalfe House, Delhi?)
 - f. [input data Vivo last version](#)
5. [Status of In-Review tickets](#)

Notes

Draft notes in Google-Doc

- Don will open a ticket regarding a proposed change to data properties for courses

- AW: Relation of interesting Ontology work to the development call
 - MC: Seeking separation of concerns. Adding terms to VIVO 1.7 ontology is expected. VIVO 2.0 to remodel things.
 - RO: perhaps the architecture is naturally separating these concerns.
 - MC: Perhaps two years down the road.
- VIVO Acceptance Tests -- JB
 - Acceptance tests -- used to accept the product. NOT unit tests.
 - Selenium -- drives the browser. Mimics a user. Runs on all major platforms. Firefox plug-in to create a test and run the test.
 - Previously -- 28 test suites for testing presentation, editing, search, indexing, permissions, and much more.
 - Run manually -- 3 hour process. Run on the release candidates. Not run for 1.10, not maintained. 28 suites, 242 tests, 18,423 steps.
 - Not portable. Fixed file paths. Difficult to write, difficult to maintain.
 - Goals for new tests
 - Fully automated
 - Repeatable
 - Portable
 - Multi-browser. Ruby is headless, runs in Selenium.
 - Easy to write and maintain tests
 - Will use Ruby and RSpec. Suites are now called tests.
 - Simple infrastructure: TDB, no MySQL. Run in JettyRunner, no Tomcat. Might run without Solr.
 - Can write subroutines. Can wait for threads. Automated conversion. Now curating.
 - Tests become shared_examples in Ruby.
 - Four suites running. 24 to go (two weeks until Jim retires)
 - Jim demonstrated one of the suites
 - Run tests regularly. Continuous integration. Can make it happen.
 - <https://github.com/j2blake/vivo-acceptance-tests> dev branch. Can become a vivo-community repo.
 - Have a reasonable chance of becoming an on-going capability
 - AW: Needs to go to CI as soon as possible.
 - Test harness looks good for product evolution
 - 242 externalized, clear text tests is crazy good. These are claims about VIVO can do. If there are missing claims we add more tests.
- Next week -- Androdies -- a graphical view of the fly-in
 - Would be good to review before next week.
- Sprint starts this coming Monday -- March 18.
 - Dockerizing
- Agenda item 4 -- ORCID related.
 - VIVO confirms ORCID (might be broken)
 - Open VIVO uses ORCID sign-on and pulls from VIVO
 - Jim has some code in development that would support push to ORCID

Actions

- [Redacted]
- [Redacted] - Brian Lowe is reviewing
- [Redacted] Unable to locate Jira server for this macro. It may be due to Application Link configuration. Mike Conlon, can you give this one a
