2019-03-20 - VIVO Committers Meeting

Date

20 Mar 2019

Call-in Information

- https://duraspace.zoom.us/my/vivo1

Attendees

[blocked URL](#) Indicating note-taker

1. ~~Graham Triggs~~
2. ~~Mike Conlon~~
3. Brian Lowe
4. ~~Benjamin Gross~~
5. Jim Blake
6. ~~Tim Worrall~~
7. ~~John Fereira~~
8. ~~Muhammad Javed~~
9. Huda Khan
10. Ralph O'Flinn
11. Andrew Woods

Agenda

1. [March (18-29) sprint](#)
   a. For quick review:
      i.
      ii.
2. TAMU Scholars d
3. VIVO conference proposals

> Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Notes

Sprint updates

1. Update on Docker work

TAMU Scholars

1. Read-only UI
2. Ralph is interested in moving UI efforts forward
   - React-js and GraphQL
3. TAMU extracts/harvests from VIVO triplestore
   - Populates Solr with multiple cores ("collections")
4. Could represent an opportunity to test VIVO design approaches
5. Interest in promoting a "messaging" approach
   - Supports a decoupled architecture
   - A "pull" approach may require more effort to customize for users
   - Could potentially use the same eventing system to populate internal index as well as push externally
6. Maybe establish a new mechanism for populating derivative stores
   - Interface: listen to events from triplestore
   - Current Solr indexing would fit into this mechanism (i.e. implement interface)
   - Pushing external messages could be another implementation of the interface
   - Would require updates to applicationSetup.n3
     - Other configuration happens within the displayModel
     - DocumentModifier config should likely be pulled out of the displayModel, and put into applicationSetup.n3
     - Rationale for config to be in the displayModel was for UI/runtime updates

+ add as topic to dev call: derivative store mechanism
+ ask TAMU to come give a demo

VIVO conference proposals

1. Deadline: Apr 14th
2. Fly-in outputs
