

Logging on to the database

The "accept" database is a copy of the database that can be used for practice and experimentation. Work that is done there does not become part of the "production" database. Some browsers will give security warnings when trying to access either the accept or the production database for the first time. If you ignore the warnings and tell the browser to make an exception, there should be no problem the next time.

Accept (test database)

<https://isni-m-acc.oclc.org/>

Ignore security warnings and proceed to login screen

Production (live database)

<https://isni-m.oclc.org>

Ignore security warnings and proceed to login screen

Login credentials

name/number: PCC project members are assigned names beginning with "PCC"

password: ask project leader; each institution will maintain and update its own passwords.

A screenshot of the ISNI login interface. At the top, a grey header bar contains the text "Welcome to ISNI". Below this, the text "Before you can search you have to identify yourself." is displayed. This is followed by the instruction "Please type your name/number and password and click the send button." There are two input fields: the first is labeled "name/number" and the second is labeled "password". Both fields have a small icon of a document with the number "1" next to them. To the right of the password field is a blue button labeled "send". Below the input fields is a checkbox labeled "save password". Underneath the checkbox, a message states: "Your login and password will be saved in a cookie on this computer for a certain period of time." At the bottom of the form, a warning message reads: "If you log in from a shared computer, you are advised not to use the option save password."

Do not use the interface at www.isni.org/search for editorial work with ISNI records. This interface shows only records with assigned ISNI numbers, and it doesn't accept our login credentials.
