

2019-04-04 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and slack chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Audio/Video Conference Link: <https://duraspace.zoom.us/my/fedora>
 - Dial-in:
 - +1 408 638 0968
 - +1 646 876 9923
 - +1 669 900 6833
 - Meeting ID:
 - 812 835 3771
- Join fedora-project.slack.com on the "tech" channel

Attendee

- 1. [Danny Bernstein](#)
- 2. [Jared Whiklo](#) ★
- 3. [David Wilcox](#)
- 4. [Andrew Woods](#)
- 5. [Yinlin Chen](#)

Agenda

- 1. Announcements
- 2. ~~fcrepo4-vagrant status~~
- 3. PRS:
 - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration. <https://github.com/fcrepo4>
- 4. New issue
 - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- 5. Import Export
 - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
 - b. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- 6. <your discussion>
- 7. In Review

	Unable to locate Jira server for this macro. It may be due to Application Link configuration.									

- 9. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

10. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Notes

1. Announcements
 - a. fcrepo-camel-toolbox version 5.0.0 has been released. Might have to complete the [documentation](#).
 - b. Some other PRs to be merged around the vagrant install.
 - c. [Annual Reports](#) was released.
 - d. [David Wilcox](#) presenting at [CNI](#) with various members of the leadership around Fedora.
 - e. [Andrew Woods](#) presenting on OCFL at CNI. https://docs.google.com/presentation/d/16jKDlhvWx_5DU-X_e15xQuQTqgbO7W1mpmOt48ewxw/edit?usp=sharing
 - f. Duraspace members summit is also next week. Following summit is a leadership group meeting ([agenda](#)).
 - g. In-person meeting for the grant work being done on finding a migration path from Fedora 3 and Fedora 4 & 5. [Designing a Migration Path](#). This will result in a report (not code) around what issues and what solutions might be possible.
 - h. [Danny Bernstein](#) doing a half day workshop at ACRL on Fedora and will include some OCFL discussion.
 - i. LDCX was a two and half day meeting. Notes available (https://drive.google.com/drive/folders/1T0kgNINKk_9P36cavYc_bo6ROBsix15R)
 - j. 3 tracks to the conference
 1. AI & machine learning track. [Andrew Woods](#) attended this one.
 - a. What is the intersection between traditional cataloguing work and machine learning/AI work? Norway has done some work to creating a catalogue using AI & ML
 2. Dev-ops
 3. *-light (Blacklight, Arclight, Spotlight)
2. fcrepo4-vagrant
 - a. couple of PRs to go. <https://github.com/fcrepo4-exts/fcrepo4-vagrant/pull/94> & <https://github.com/fcrepo4-exts/fcrepo4-vagrant/pull/95>
 - b. fcrepo4-vagrant will be up-to-date once these are merged.
3. FCREPO-1889 - still some review to be done.
4. FCREPO-2991 - Do we allow any prefixes (not worrying), so we might need to encode the colon before storing in Modeshape. Would be good to get this done quickly.
5. FCREPO-2992 - Used to keep track of any information needed that is not persisted in the RDF but rather displayed in the headers.
6. import-export - best to not rely on specific version semantics so that in future it could be possible to use the same (similar) code to import/export from various versions of Fedora.
 - a. How do we determine whether an external, maybe the status code and store the information. Perhaps store a constructed Link header that would be usable to recreate the resource and would store the redirect/proxy definition.

Actions

- [Peter Eichman](#) is planning to work on dc
 - will complete review of configuration. when J
 - review
