### Status updates and planning

- Enhanced Discovery (see also <https://wiki.duraspace.org/x/sJI7Bg> and <https://github.com/LD4P/discovery/projects/1>)
  - Key result from Astrid's user tests is that undergrads do see benefit in author knowledge panels
  - Tim has set up a copy of the D&A system on dev VM using the production Solr index (with special query so it can be tracked separately from real traffic). Will work with Huda to explore adding code to implement some of the mockup additional lookups in a copy of our catalog
- Authority Lookups for Sinopia (Lookup infrastructure: [https://github.com/LD4P/qa\\_server/projects/2](https://github.com/LD4P/qa_server/projects/2), Authority requests: [https://github.com/LD4P/qa\\_server/projects/1](https://github.com/LD4P/qa_server/projects/1))
  - 2019-04-26 SF added context for SVDE entities to spreadsheet, needs review. Still need to write tests. Side note: SF is looking at SVDE's Stardog SPARQL endpoint to see if it's more performant than DAVE.
  - 2019-04-26 Lynette has discussed with Dave and he expects #69 and #53 to be done by end Monday, and then #70 to follow shortly after. #69 unblocks pushing Idpath work without network access up to the live server. Working to get #64, #44, #61 done in live in time for the LD4 conference
  - Huda will add issue about showing context in Sinopia as demo for LD4 meeting
- Prep for Cataloging Sinatra and other 45's (Discogs data, [https://github.com/LD4P/qa\\_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs](https://github.com/LD4P/qa_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs))
  - ON HOLD pending more work in Sinopia to import data.
