Notes

- Sprint
 - Sprint has been locked down for September
 - Creating Pilot slack channel for those running pilot projects
- OR Reflections
 - OCFL well received, bodes well for Fedora 6
 - [Bethany Seeger](#) has #regret for missing the Duraspace rager
- 5.1.0 Release
 - <https://github.com/fcrepo4/fcrepo4/pull/1531> needs review
 - 5.1.0 RC2 will be cut after it is merged
 - [Daniel Lamb](#) will test with an Islandora 8 instance
- Import/Export
 - Fedora 3 6 migration is separate from Import/Export proper, but related.
 - Current thoughts are to use a file system transform
- OAI-PMH?
 - An often asked for feature. A Fedora 4 plugin exists, but maintenance support for it hasn't materialized from the community.
 - Would be pretty easy to do once the search feature is implemented in Fedora 6
 - Should be formalized into a feature request for 6
- Kubernetes
 - Lots of interest, but some features, particularly transactions, are incredibly difficult in distributed environments

Actions

- [Peter Eichman](#) is planning to work on documenting UMD's fixity check system on the [Fedora in Production: Case Studies](#) wiki page.
- [Jared Whiklo](#) to fix Java 11 javadoc errors in a new ticket, link to fcrepo-2958
