2019-06-23 VIVO Updates

Conference poster deadline July 19 Did you miss a deadline to submit work to the conference? It's not too late to submit a poster. Poster submission is open now at https://forms.gle/xLGyGsdT58jJBmMc7 through July 19. Posters can be on any topics related to VIVO – implementation, development, ontology, adoption, representation, data curation, persistent identifiers, and much more. All our sites are doing interesting work. Please consider submitting a poster for the conference.

Christian Hauschke on LG Congratulations to Christian Hauschke of TIB, Hannover who was elected to represent the bronze members of the VIVO Project. Each year, the bronze members elect a representative to serve on the VIVO Leadership Group. Welcome Christian!

Becoming a member of the VIVO Project means your institution supports VIVO financially. This support makes it possible for us to have a project, develop software, and make it available as open source to the community. Please consider supporting the VIVO project as a member. You can become a member here: http://bit.ly/dura-join And if your institution is already a member, thank you!

Community nominations Each year, the VIVO community elects three members of the community to serve on the VIVO Leadership Group. Community members at member institutions nominate members of the community who are eager and able to serve to help develop and execute strategy for the project. Anyone may be nominated. Nominations are open through June 28 (this Friday). See http://bit.ly/2ZKGhYt . Self nominations are welcome.

Freya PID graph The Freya Project is a large scale EU project to assemble identified data about scholarship. They are building an open knowledge graph that they called a "PID graph" for persistent identifier (PID). The VIVO community has significant experience with building knowledge graphs at the institutional level, curating and identifying data. Learn more about Freya, and their approach here: https://www.project-freya.eu/en/blogs/blogs/the-pid-graph

Go VIVO!

Mike
