

2019-09-06 Cornell LD4P2 Meeting notes

Date: 06 Sep 2019

Attendees: Jason, Steven, Tim, Lynette, Huda, John, Simeon

Regrets: getting a new Mac that cost many \$ and isn't as fast as an old one

Agenda & Notes

Review actions from 2019-08-30 Cornell LD4P2 Meeting notes

- [Tim Worrall](#) and [Steven Folsom](#) to try the load tab with data from Discogs and an appropriate template.
 - Steven continuing to work on profiles; he's on vacation for 2 weeks starting 8/12 so expect no template progress.
 - 2019.08.16: 10 resource templates were pushed. Next week [Tim Worrall](#) will have time to load those locally on his instance and then try to load n3 generated via QA. Update forthcoming
 - 2019-08-30 - Can't get n3 to load when it references more than one template. [Tim Worrall](#) will explore further and report bug if it is. UPDATE: Tim was able to load n3 that referenced two and three templates.
 - DONE - we can load n3 that references multiple templates. We thus have every reason to expect that loading Discogs data will be fine when there is a load facility from lookup (other than the current manual paste)
- [E. Lynette Rayle](#) will work with Michelle to develop a prioritization process. [Steven Folsom](#) is starting the slack thread b/t Michelle and Lynette
 - 2019-08-30 Steven and Michelle had a call and will filter new requests using :+1: style voting from the cohort. Have separated 8 or 9 out of 20 requests which are just small drop-downs and wouldn't benefit from QA work – PR for this has an issue that Steven is working with Jeremy on
 - 2019-09-06 Process agreed, waiting on [Michelle Futornick](#) to push out request for input
- [Simeon Warner](#), [E. Lynette Rayle](#), [Steven Folsom](#) to apply for LODLAM
 - Not done, deadline in 30 Sep
- [Simeon Warner](#) & [Jason Kovari](#) to discuss possibility of early experiment with original cataloging for items not found in Discogs to test profile and editor, and resolve question of when catalogers should start on the project
 - Done, Planning to start cataloging Oct 1 which will be before release of Sinopia supporting discogs import
- [Steven Folsom](#) will work with [Tim Worrall](#) to check with profile as to where we want nodes
 - We know what we want but we still need to:
 - [Tim Worrall](#) to update discogs code to use standard bnoder format
 - [Steven Folsom](#) to update profiles to remove old pattern resulting in unnecessary nodes
- [Huda Khan](#) et al. – KPAOW video and write up: Make short video. Write up successes, difficulties, lessons, data and index needs, areas for continued work (if and when)
 - [Video version 1](#) – DONE video and looks good, [Huda Khan](#) to upload youtube, [Simeon Warner](#) to ask Zsuzsa about whether organize CUL-IT videos under CUL
 - [Usability results write up \(in progress still\)](#) – [Huda Khan](#) to complete write-up
 - Lessons/results in progress, will be shared by next meeting – for next week
- Issues:
 - [Overall Project Board](#)

Status updates and planning

- Prep for Cataloging Sinatra and other 45's (Discogs data, https://github.com/ld4p/qa_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs)
 - ON HOLD pending more work in Sinopia to import data. Sinopia work cycle 2 will we hope include the ability to read in RDF back from Trellis. We hope that we can leverage this to import RDF from a lookup in Discogs or ShareVDE
 - Waiting for Work Cycle 2 (starting week of Sep 23) to understand whether the derivation/cloning work item will happen during Fall – we need to emphasize the importance of cloning
 - Expect to start cataloging work on Oct 1
- Enhanced Discovery (see also <https://wiki.duraspace.org/x/sJl7Bg> and <https://github.com/LD4P/discovery/projects/1>)
 - BAM!
 - Have starting slide deck
 - Need to think about where linked data fits in well; related works; how to make our browse better; how to deal with hierarchy; moving past long lists; connecting place and time; intended audience; relation to facets and showing scope/possibilities; interesting use cases to explore; data and indexing (do we need to do things at index time?)
 - Try a shorter work cycle for this as we went over with KPAOW a bit... ~1.5 months
 - @all to work on plan to review next week
 - [Initial draft of BAM plan](#)
 - Will continue to work on plan – review progress next week
 - Look at doing upgrade to current BL7 early so it isn't a delay in later dev work, also consider repo organization
 - Current browse is rather separate from search experience - can we make that connection more fluid?
 - Need to come up with a few motivation examples
 - Anything to learn from virtual shelf experiments for subject libraries? Or idea of "new" items? How does one fine entry point for a subset browse? What audiences are most likely to use a browse? Is this something that might interest faculty/researchers more than undergrads (other way round to knowledge panels)?
 - This will be a track at the BL-LD meeting
- Authority Lookups for Sinopia (Lookup infrastructure: https://github.com/LD4P/qa_server/projects/2, Authority requests: https://github.com/LD4P/qa_server/projects/1)
 - Lynette has first stab at response time analysis, typical response from QA is 0.4-0.5s with about half and half between loading data from Dave/parsing graph, and then normalization in QA
 - Will look at concurrency next week
 - Dave has all of SVDE data loaded

- Travel and meetings (see [LD4P2 Cornell Meeting Attendances](#))
 - LD4 BL meeting September 23 week in Stanford
 - Huda, John, Steven going
 - European BIBFRAME Summit in September 16-17th-ish
 - Jason going and ARM/rare-cohort proposal accepted
 - Blacklight Summit will be at Duke, 9, 10, 11 October at Duke
 - Huda
 - Samvera Connect, week of October 21 (WUSTL)
 - Lynette to present on QA (Simeon also going but not on LD4P funds)
 - Fall partner and cohort meeting in DC, November 12/13
 - [Cohort and Partner Meetings#3: November 12-13 2019, Library of Congress](#)
 - Everyone should plan on attending
 - 5th International LODLAM SUMMIT at the The Getty Center in Los Angeles. February 3-4, 2020
 - Steven is on the planning committee, Lynette and Simeon to apply
 - Expect to have a "tool challenge" - a competition before the conference
 - LD4 Conference at College Station, TX (TAMU) - May 2020
 - rdfs:seeAlso [Conferences Related to Linked Data in Libraries](#)
- Next meetings:
 - Jason remote, Simeon out - 20 Sep
